HIGH-TECH FOR YOUR PASSION

There's nothing in the world to compare with a SPORTEX rod. It owes its legendary reputation to the power of innovation and the unique technology which for decades has set standards worldwide. Today, our rods are a byword for reliability and master craftsmanship.

What makes SPORTEX rods so unique?

They are not simply uniform rods 'off the peg'.

Every rod is an individual creation, even within the same series, adjusted in length, action and component composition to suit the particular casting weight, distance and anticipated twist.

Our rods are symbols of quality and long service, attributes which are becoming ever more important in these days of fast-paced living. It is with pride that we can say that SPORTEX rods have excited generations of anglers with their reliability in demanding situations and their incredibly long

life. Sustained research with new materials and material combinations are the bedrock. No other rod manufacturer can take advantage of such a wide range of materials for rod production.

We stand by our products – and that's guaranteed!

Our **quality control procedures** meet the highest possible demands, whether it is the selection of the material and components specific to the rod, the painstaking checking during the manufacturing process of the blanks or the ongoing inspections at the rod make-up stage. Every SPORTEX rod is an exquisitely crafted **quality product**. And we, the manufacturers, stand by that with our 10-year blank guarantee*.

*Add-on parts such as guides and reel holders are covered by the statutory 2-year guarantee

For rods without compromise only components without compromise will suffice

Anyone who wants to be a world leader when it comes to making rods cannot allow for compromise.

- **Original FUJI guides and FUJI reel holders**
- **Natural cork of premium class AAA**
- **Wear-resistant Duplon of the highest grade**
- **Special lacquer – elastic and impact resistant**

Every SPORTEX rod is the result of long years of practical experience and innovative technical know-how.

Our **technical knowledge** has grown over the decades. In the Fifties, we were renowned for the honey-coloured fibreglass blanks which set countless records in casting distance and precision. And when innovative **carbon fibre materials** arrived, we were among the first to recognise their potential for making rods, and put them to use. Thanks to our own **SPORTEX HT-Cross Winding blank technology**, our rods are unique in their combination of strength, lightness and speed.

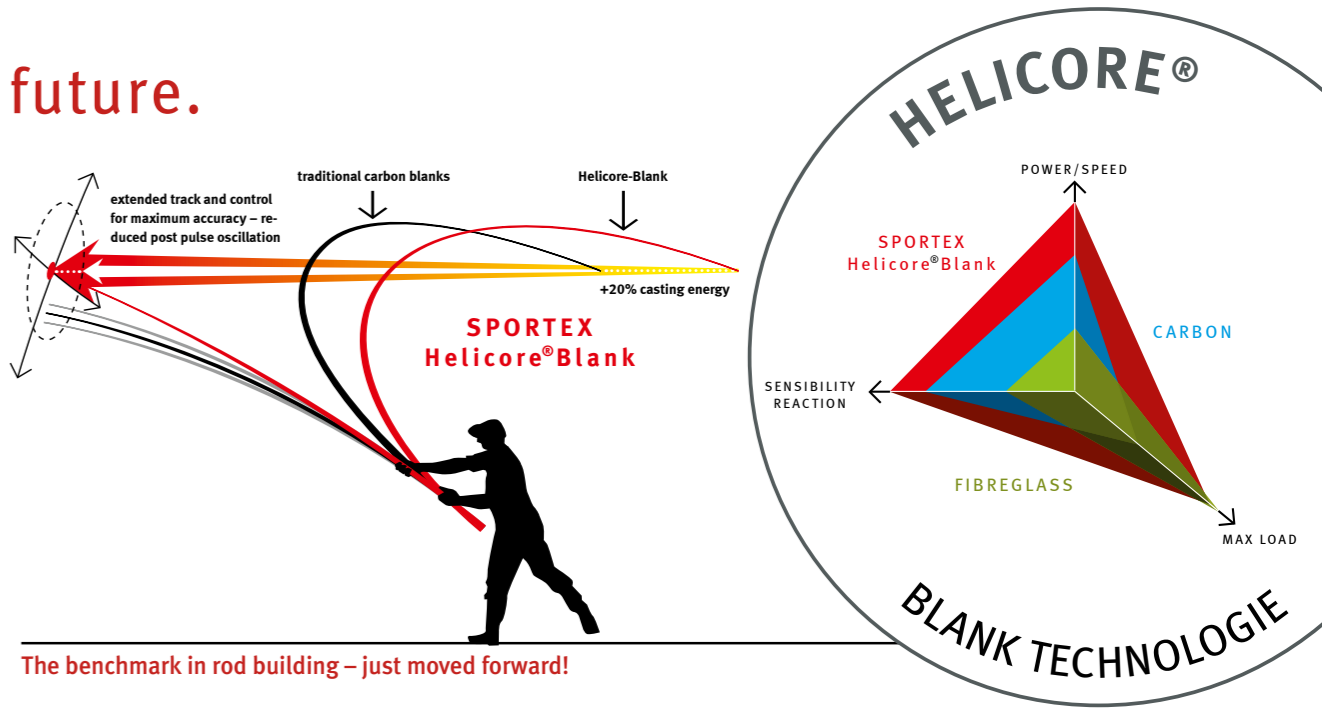

At the heart of every agile SPORTEX fishing rod are the right fibres and the innovative processing under which they go

We use only the latest and highest quality carbon fibres for our rods, sourced from the leading manufacturers. What makes our knowledge and skills so special is how we achieve the specific mixture of the most varied materials, such as highly modulated carbon fibres, Kevlar, Boron or Zylon, and merge them into a frictional force-closed combination. This enables us to exploit the advantages of the individual fibre materials, such as flexural strength and tensile strength, lightness, impact resistance, speed and resistance to breakage in optimum combinations. And the result? Rods tailored individually to specific types of fishing and angling techniques, with the fast action typical of SPORTEX.

SPORTEX-technology of the future.

The Sportex Helicore®Blank is a masterpiece in rod building, unifying the best possible features in all disciplines. The new technology is a strict development of **SPORTEX's proprietary HT Cross Winding process**, taking into account the latest in material science and manufacturing technology. The result: incredibly light and fast blanks that are more sensitive but at least as robust, strong and long lasting as millions of fishermen worldwide know it from SPORTEX. It simply fishes better than any other blank used in today's rods.

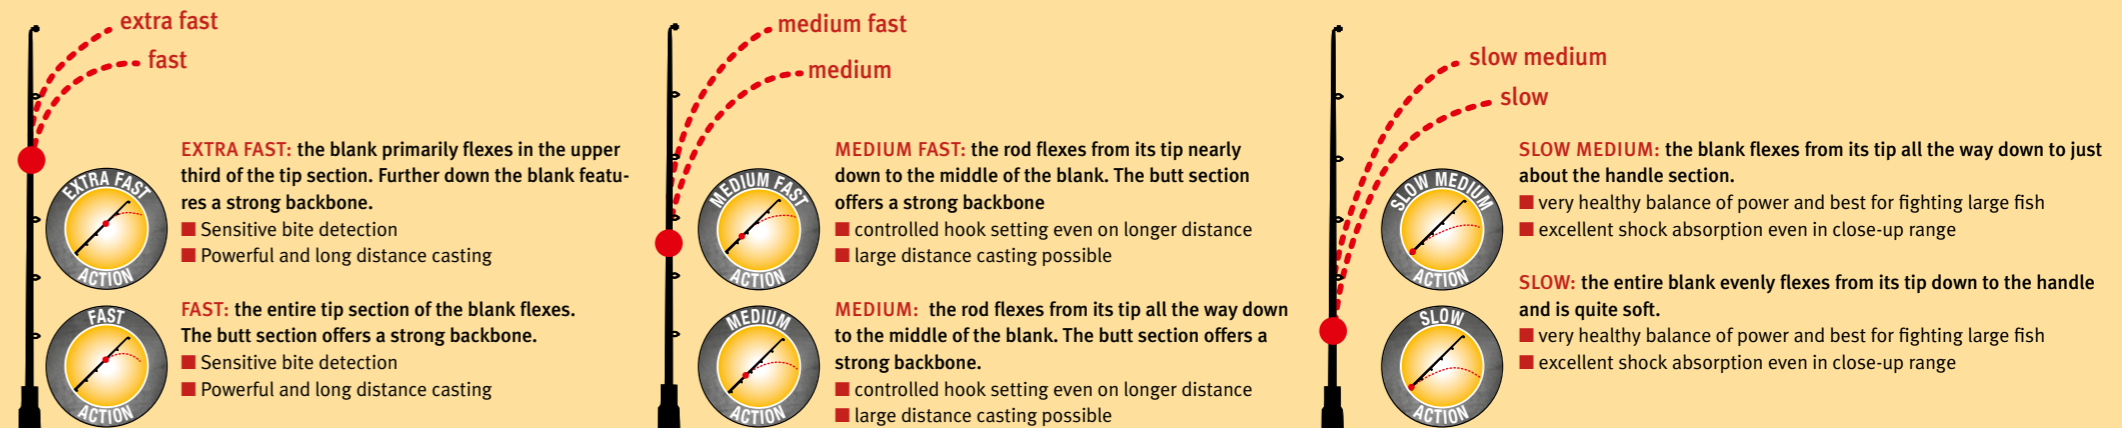

When casting, you will feel the difference: Post-pulse oscillation is dramatically reduced and the blank loads up to 20% more energy – resulting in longer and more targeted casting.

The benchmark in rod building – just moved forward!

Rod action

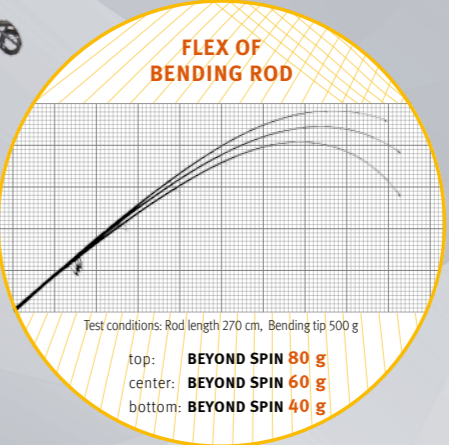

A fast and individually designed rod action to perfectly meet the requirements of a specific angling application is quintessentially to all SPORTEX rods:

SPORTEX BEYOND **NEW**

AN OUTSTANDING ROD SERIES WITH SUPERLATIVE QUALITIES THROUGHOUT.

TECHNICAL INFORMATION

The game-changing Heptacore blank is built on T1000 carbon fibres and features a unique profile, which is heptagonal (seven-sided) instead of round like 99.99% of ALL rods. This complex advancement in blank construction represents a quantum leap in rod building and pushes the capacity of carbon beyond what anyone thought possible. Heptacore outperforms common blanks with round profiles by about +20% in casting performance and +15% in power.

The advantages:

- A healthy margin in casting distance and precision
- Extraordinary sensitivity
- Unknown speed in casting and striking
- Inconceivable power

BEYOND SPIN

The blank has a semi-parabolic action and incredible speed. The unique seven-cornered blank shape means that, when casting, the blank cannot veer to the left or the right. In other words, your bait is always exactly on target. The Beyond Spin also makes no compromises when it comes to staying connected with the bait. Every contact with the bottom, every patch of weed and every bite is passed straight to the angler. These unique rods make for simply sensational fishing.

BEYOND CARP

Nothing surpasses these rods for distance casting. Thanks to the special new design of the blank, casts go further and with less effort. And when playing even the feistiest of fish, the enormous strength reserves that the rod can deploy make themselves felt straight away, making it a whole lot easier to draw fish out of an underwater jungle. This blank also has excellent damping properties that easily deal with getaway attempts and reduce the chance of the hook slipping out.

THE ULTIMATE POWER COMBINATION OF HIGH-TECH CARBON FIBRES AND GRAPHENE

GRAPHENON SPIN

GRAPHENON CARP

GRAPHENON SEATROUT

GRAPHENON CARP BOAT

TECHNICAL INFORMATION

The name gives it away.... alongside carbon, we also use graphene as a major component. Graphene is a carbon modification with a two-dimensional structure. Each carbon atom is surrounded by three others at an angle of 120°, which creates a honeycomb pattern. It has the highest tensile strength of any previously known material (e.g. 125 times higher than steel). The rod blanks contain around 20% graphene, which makes a massive contribution to load capacity, speed and casting performance.

GRAPHENON SPIN

The lightweight Graphenon Spin offers huge power deployment, good resistance when playing fish and long, precise casting. Add excellent bait 'feel' and sensitivity, together with a progressive action, and these rods make the perfect companion on the water. The Ultra Light model is specially designed for very small lightweight baits. It comes with a super-sensitive tip that ensures every bite is transferred straight to the handle. The rods in the series are fitted with FUJII-TVS reel seats, FUJII-KL /KT-SIC guides and tough, ergonomically-designed Duplon handles. The Seatrout models are fitted with full cork handles. This is our high-tech premium rod series – and everything you could ask for!

GRAPHENON TRAVEL ULTRA

The Graphenon Travel Ultra breaks down into extra short sections to fit into almost every suitcase, making it perfect for any fishing trip or for anglers on the move carrying just a simple rucksack. Despite the multiple sections, this is a rod with a superb action very similar to the regular spinning rods. When it comes to casting, there's no compromise. When it comes to playing, there's no contest.

GRAPHENON CARP

The Graphenon Carp owes its impressive performance to its enormous power deployment and resistance when playing fish. It's always the rod – not the angler - doing the work. The excellent damping properties of the blank make the fish tire very quickly and reduce the risk of it getting away just short of the landing net. The rod's rapid reset capacity, in combination with great loading dynamics, also allows for very long and precise casting.

GRAPHENON BOAT

This shortened version of the Graphenon Carp is ideally suited for use on boats or in restricted spaces. Despite being short, these rods generate enough power to match any carp, while casting from the bank is simple and stylish.

SPINNING RODS

FLEX OF SPORTEX PREDATOR RODS

BENDING ROD TEST:

To visualise the character of each of our rods all blanks are precisely positioned in a measuring device and stress-tested with a uniform weight.
The resulting images are digitally rendered onto a standardised diagram to show the actual flex of each rod. Note that this diagram displays the individual flex of a rod series but not its action (fast, medium fast etc).

- Test conditions:
- Rod length 2,70 m
 - Cast 40 g
 - Bending tip with a weight of 500 g

SPORTEX AIR SPIN

VERY LIGHT, VERY FAST, VERY FINE: AN EXCLUSIVE SERIES OF RODS

AIR SPIN

SPORTEX AIR SPIN SEATROUT WITH LUXURY CORK GRIP AAAA-GRADE

Very light, very fast, very fine: this exclusive series of rods features a combination of exquisite characteristics. At their core is the new Helicore blank, which is designed for maximum lightness. With its composite material of T800 carbon fibres and special epoxy resin with finest nanoparticles, it gives the Air Spin unequalled speed and stability. The ultra-light FUJI TORZITE guides with titanium frames amplify

the feather-weight character and boost casting like no other guide available in the market. Added to this, the extra-ordinary loading capacities of the blanks mean that both, artificial and natural baits can be cast with extreme precision at long distances without any major effort. The sensitive blank provides radar-like control and passes even the slightest of takes right into your handle, whilst retaining unbelievable

strength to handle the most explosive fight with superior ease. These rods – probably the lightest ones available – definitely donate an extraordinary fishing experience. The FUJI reel seats, a distinctive finish with the added touch of special varnish, and the high quality handles made of finest cork (sea trout) or Duplon round these outstanding premium rods off.

SPORTEX ABSOLUT NT NEW

ABSOLUTELY NEW – AND MUCH SOUGHT-AFTER!

ABSOLUT NT

The ideal predator rod for the ambitious angler!

ABSOLUT NT

The challenge when developing the new Absolut NT was to revolutionise the excellent Helicore blank of the previous model. We spent a vast amount of time creating an extraordinary blank incorporating the very latest materials and technologies. Nano-carbon fibres were woven in a special process and subjected to enormous pressure, so as to increase the tear resistance of the individual fibres. This in turn enabled us to produce an even more resistant Helicore blank for the Absolut NT. This series is also characterised by its extremely light weight, speed, fine sensitivity and enormous power. Long casts, precise bait guidance, reliable bite indication and consistent striking action all contribute to the rod's excellent performance. Here is the perfect predator rod for anglers who want only the best.

SPORTEX HYPERION XT

ELEGANCE MATCHED WITH SPORTINESS

HYPERION XT

SPORTEX TIBORON

TIBORON

HYPERION XT
Modern meets classic in this newly-developed Hyperion XT Series of spinning rods – a range of gems with that touch of extra class. The high-tech Helicore blank, made of T800 carbon fibres and special epoxy resin with extremely fine nanoparticles, gives these exceptional rods tremendous speed and fantastic lightness. Thanks to the perfect loading properties of the blank, artificial and natural baits can be cast accurately over long distances with very little effort. The high sensitivity of the blank means that even the slightest nibble can be felt directly in the handle. The fine balance means the HYPERON XT feels very comfortable in the hand, providing fatigue-free fishing for hours at a time. Lightweight FUJI Alconite SIC guides, the best cork and a FUJI quality VSS reel seat are the perfect additions to this premium rod. The Hyperion XT is another exceptional newcomer to the SPORTEX range – a fishing rod with so much more.

TIBORON
The new TIBORON rods are based on the SPORTEX Helicore Blanks, which have always shown the way ahead. By further development of the previous composite on a nano base, we have been able to improve the extra-ordinary properties of the blanks still further – and set the bar still higher. Thanks to these new improvements, the TIBORON has a speed and strength that leave other rods standing. The Helicore blank is now even tougher and has incredible loading capacity, comfortably delivering the bait precisely over long distances. The excellent sensitivity of the blank transfers the faintest touch directly into the hand section, while the powerful backbone

guarantees full control over the bait and the fish in every situation. The lightness of the TIBORON means fatigue-free casting over and over again, all day long. In addition, computer-optimised weights located in the handle ensure that the rod is perfectly balanced in the hand. The finest materials and components went into creating the TIBORON, such as SIC guides from FUJI, new FUJI TVS reel seats, removable FUJI hook eyes and the finest quality duplon material. The TIBORONs elegant design will draw many an envious look out on the water.

SPORTEX STYX²

OUT FISHING ALREADY, OR ARE YOU STILL DREAMING ...

The new STYX2 rods are made to bring your dream fish a whole lot closer. No matter where you are, lake, river or sea, STYX2 will never leave you high and dry. With an extremely light blank and an action that's super-fast and super-strong, you get to enjoy the bite, the lift and the thrill of playing right to the end. The new STYX2 rods, they're a passion...

STYX² T
Your first choice for hunting big predators with modern twitch baits. The blank has the optimum rigidity for seductive lure play and perfect feel. The STYX2 T is available in medium, medium heavy and extra heavy casting weights. There's a baitcast version as well as a fixed spool model, with SIC rings to match.

STYX² B
STYX2 B rods are designed for perch, zander and pike fishing. The first class casting characteristics of the blank cast the bait right to the fish, even at long range. The optimum bait control combined with the sensitivity of the rod make for direct bite detection, right into the handle.

STYX² V
Light and finely balanced vertical rod for fatigue-free fishing, with a sensitive tip and powerful backbone. With the STYX2 V, precise presentation of the lure becomes child's play and bites are easily detected thanks to direct contact with the bait. The STYX2 V is available in medium and extra heavy casting weights. The rods are available in both baitcast and fixed spool versions, with SIC rings to match.

STYX² Z
Rods specially designed for zander. STYX2 Z models are ideal for fishing with both artificial and natural baits. The tip is extremely sensitive and extremely fast, and combined with the powerful backbone, instantly and reliably sets the hook. The gentle flex of the blank provides perfect shock absorption in fights with strong fish, meaning fewer get away when being played.

SPORTEX CARAT SPECIAL XT

PURE PERFORMANCE!

CARAT SPECIAL XT
The new Carat Special XT series features a modern, fast and powerful Helicore blank made of T700 carbon fibres with nanotechnology. Particularly noteworthy are the excellent loading properties, the especially fine sensitivity and the balanced strength of the blank. These factors allow for long, precise casts, help in ensuring perfect bait control, and make for complete command of the fish after the bite. The sensitive tip passes every contact with a fish right into the handle.

The rods have a dynamic semi-parabolic action, fitting easily and comfortably in the hand. The Carat Spezial series comes with original FUJI Alconite guides, a FUJI VSS reel seat and hard-wearing Duplon handles. The Seatrout rods have a cork handle. All round, this is an excellent series of rods, ideal for small and larger predators alike.

CARAT SPECIAL XT ULR *NEW*
The Carat Special XT Ultra-Light model comes with an extremely sensitive and flexible tip, transmitting even the most cautious bite and allowing the fish to take the bait without any noticeable resistance.

SPORTEX BLACK ARROW G2

BLACK ARROW G2

BLACK ARROW G2 ULTRA LIGHT

BLACK ARROW G2

The Black Arrow Series has been completely upgraded and now combines a stylish appearance with high-tech blank material, especially matched to the challenges of modern spin fishing. Thanks to the use of Japanese high-performance carbon, we have been able to boost the speed and sensitivity of the blank compared to its predecessor. The rods are very slim, but when you are playing a fish, they provide enormous strength, and even the fiercest trophy fish can rapidly be brought to heel. Also, the fast recovery of the blank makes for long and precise casting.

The Ultra-Light model, with its newly developed and enormously sensitive tip, is ideally suited for use with small and very light lures for perch, trout and zander.

SPORTEX CAPTOR SPIN NEW

THE CLASSY ROD SERIES FOR PREDATORS!

CAPTOR SPIN

The new eye-catching Captor Spin series is built on a striking, slim high-speed blank made from Japanese high-modulus-carbon. Designed for perch, trout, pike and zander, these rods feature amazing sensitivity and excellent casting qualities. The tip is designed to transmit every nibble with total reliability and, by dampening every attempt to escape, significantly reduces the number of lost fish.

Thanks to the progressive deployment of strength in the semi-parabolic action, the blank always provides the power needed to keep the fish on the hook and safely under control when it is being played. The cast, the feel of the bait sinking and then the 'plunk' when the bait hits the bottom, are all clearly felt back in the handle section.

SPORTEX HYDRA SPEED

QUICKNESS AND STRENGTH...

HYDRA SPEED

high-quality SIC-Guides

Speed and strength are the hallmarks of this new series. The rods feature an extremely fast action matched with a powerful backbone. The blank, made from high-performance carbon, delivers low weight and great sensitivity. The rods also feature excellent loading and reset capacity, which produce really long casts with spot-on accuracy. The lightweight blank also allows for hours of casting with no strain and plenty of gain.

The rods come fitted with SIC guides, a tough VSS reel seat and top quality Duplon handles. Depending on the model, this universal rod series is ideally suited for spinning, twitching, jigging, trolling, and, of course, regular angling.

SPORTEX CURVE SPIN

LIGHTWEIGHT ROD SERIES WITH FANTASTIC ACTION!

CURVE SPIN

This newly developed all-round spinning rod series with a parabolic action right into the handle makes playing fish a pure pleasure. A special production technique has allowed us to fit the Curve Spin series with a blank that is very light and slim, but with exceptional loading capabilities. During development, particular attention was paid to the sensitivity and the damping characteristics of the blank. This means that even the most cautious nibbles are passed to the

handle, and those fish that do get away are reduced to a few lucky (or unlucky) exceptions. Thanks to its low weight, the Curve Spin lies perfectly balanced in the hand and allows for long hours of casting with no feelings of fatigue. The rods come fitted with full Duplon handles, aluminium hoods, top quality SIC guides from Seaguide and VSS reel seats. The series has an excellent price-performance ratio.

SPORTEX BASSISTA NEW

PLAYING THE FISH IS ALL IN THE GAME!

BASSISTA FINESSE/
BASSISTA DROPSHOT

BASSISTA VERTICAL

BASSISTA JERK

BASSISTA FINESSE
This modern rod series has been created for finesse fishing with small wobblers, soft baits, micro-jigs etc. The blank, made of Japanese high-performance carbon with X4-Cross technology, makes its presence felt with superb high sensitivity, speed and enormous reserves of power. These rods make correct bait presentation easy.

BASSISTA DROP SHOT
The Dropshot Series also has a Japanese high-performance carbon blank with X4-Cross technology, providing truly impressive sensitivity, speed and enormous power reserves. The very fine and flexible tip reliably signals even the most tentative nibble, allowing the fish to take the bait without resistance. The action is specially matched to suit all kinds of dropshot applications. The backbone can be relied upon to land even the best trophy fish.

BASSISTA VERTICAL
The Japanese high-performance carbon blank with X4-Cross technology and superb sensitivity allows for optimum bait delivery and direct bite recognition when vertical fishing. The powerful spine allows for rapid, direct striking and makes it hard for the fish to escape the hook. Components include FUJI F-type KW guides, FUJI ACS-16 baitcast reel seats and durable Duplon handles.

BASSISTA JERK
Stiff, lightweight jerk rods, made of Japanese high-performance carbon, with a fast and hard rod tip. Perfect for the controlled, speeded-up retrieve of small and large jerk baits. The stiff backbone provides sufficient power to get the better of the biggest pike. Components include FUJI F-type KW guides, FUJI ACS-17 baitcast reel seats and durable Duplon handles.

NOVA TWITCH

The new NOVA Twitch series comprises very light and fast rods for finesse fishing for trout, perch and zander. The use of top quality, high-performance carbon from Japan gives the blank enormous speed and extreme lightness. They have highly sensitive and fast tips, which relay even the lightest bites directly to the handle. The semi-parabolic action gives the rods the backbone to apply all the pressure needed, even on bigger fish. The NOVA Twitch has an excellent price-performance ratio and is the ideal rod for use with modern baits for twitching.

NOVA JERK

Lightweight rigid jerk rods for rapid flicks of small and large jerk baits. Thanks to the special Uptide arrangement, the Nova Jerk has an almost continuous action, which makes for perfect bait control. The rods are fitted with a trigger handle for using a baitcast reel and SIC Lowrider guides for added smoothness. **NOVA VERTICAL** Rods designed for vertical fishing from a boat. These rods make for perfect control of the bait close to the bottom. The fast blank with its very sensitive tip flags up every bite absolutely without fail, and allows for the fish and the bait to be drawn in without any serious resistance. The rods also have a powerful backbone, meaning that enough pressure can be built up to handle even big fighters.

NOVA ULTRA LIGHT

Very fine and extremely sensitive rods with a fitted tip made of full carbon, for use with small and very light baits for perch, trout, and zander. The NOVA ULR is available in 185cm and 200cm versions with casting weights of 1-5g and 2-9g. **NOVA TWITCH HEAVY** A lightweight and rigid rod designed for fishing with large baits for pike and similar fish. The rod has a very fast and very sensitive action, which means that when a bite happens the strike can be made straight away, and absolutely on target. The superior loading properties of the blank also mean that heavy baits can be cast extremely well. There are two different versions of the Nova Twitch Heavy available, one with a trigger handle for using a baitcast reel and SIC Lowrider guides, the other with a fixed spool reel holder and KL style guides.

SPORTEX CARBOFLEX CLASSX

CLASSIC AND SPORTY

CARBOFLEX CLASSX

SPORTEX BLACK PEARL

 **Travel rod**
BLACK PEARL TRAVEL
Please look at page 40/41

BLACK PEARL

CARBOFLEX CLASSX

In classic style but with a sporty edge demonstrating true SPORTEX heritage, our Carboflex ClassX Series is all set for the new season. With a newly-developed blank, the series is both extremely fast and tough. The classic SPORTEX semi-parabolic action means these rods are the perfect tools for the modern predator angler. Key features include a powerful action, no delay in the response, accurate casting, perfect bait delivery and a highly sensitive reaction to bites – all of which guarantee you will catch more fish, more often. The Carboflex ClassX series is fitted with top-quality cork handles, SIC guides and a DPS reel seat.

BLACK PEARL

With the new development of this series, we are sure that we have even succeeded in topping the excellent qualities of its illustrious predecessors. We have now made the new lightweight and powerful blank, made of high-modulus carbon, even faster and even slimmer. The loading properties of the blank have also been improved even further, with a positive effect on greater casting distances (even with lightweight baits). When it comes to sensitivity, there has been another leap forward. The new Black Pearl allows for perfect control over casting direction, and, when using jig heads with soft lures, every ground contact of the lead head is transmitted to the hand with its

typical 'tock'. The powerful backbone, which ensures reliable lifting and optimum control of the fish while it is being played, makes the Black Pearl the ideal companion on the water. The rod series is fitted with stable high quality SIC guides, VSS reel seat and high quality Duplon handles. Also new in the range are baitcasting rods (1.90m at 20g casting weight / 2.10m at 40g casting weight), and special 5-part Travel-Spin rods (2.70m with 60g and 80g casting weights; see page 102–103). For heavy-duty fishing with large shads, there are the Black Pearl Shad rods in 2.4m and 2.7m with a casting weight of 170g, which are also ideal for spin fishing for catfish.

SPORTEX HUCHEN DE LUX XT NEW

HUCHEN DE LUX

This powerful, classic, perennial rod series is designed for big fish anglers.

HUCHEN DE LUX

The blank incorporates the tried and trusted SPORTEX HT cross-winding technology, which provides improved stability and rapid reset performance. The rods are fitted with best quality, natural cork handles, along with extra large and stable guides that prevent problems with ring icing in the winter. The tip action allows for controlled bait presentation in the current, as well as

penetrating strikes into the very hard mouths of Danube salmon. Thanks to the weight integrated in the handle section, the rod is perfectly balanced and easy to handle. The rod can also be used for heavy pike.

SPORTEX SALMON DE LUX

SALMON DE LUX

A four-section giant salmon rod, complete with tried and trusted SPORTEX HT cross-winding technology. The blank is made of several parts, but high-modulus carbon gives it the strength to deal with any salmon or taimen. Thanks to its semi-parabolic action, the Salmon de Lux has plenty of power in reserve to confidently bring even bigger fish out of the current and into the landing net. This all-rounder, with its typical fast SPORTEX action, can be used for spin fishing as well as bottom fishing. The rods come with durable SIC guides, DPS reel seats and high quality natural cork handles.

SPORTEX AVON DE LUX

SPORTEX KEVLAR

AVON DE LUX
This series of rods is great for all-round float and bottom fishing. Avon rods are intended for use in still and running water, for predator and prey fish alike. They offer excellent performance when after pike or zander with dead baits, or when fishing with fixed lead rigs or swim feeders for feisty barbel. The almost parabolic blank has a powerful backbone and a sensitive fast tip, which makes for a penetrating strike and secure hooking. The rods come with a natural cork handle, FUJI DPS reel seats, stable SIC guides and aluminium hoods. A rod series for anyone looking for maximum flexibility on the water.

KEVLAR
These high-quality, almost unbreakable rods have been synonymous for years with lightness, stability and strength. Thanks to over 30 years of experience in the building of Kevlar rods, with this rod series we were able to optimally combine the lightness and breaking strength of Kevlar with the resilience and rigidity of carbon fibres. This material mix is made up of 50% Kevlar and 50% high-quality HM carbon fibres and makes for extremely light blanks with a strong spine. The organic action curve from the butt to the tip provides accurate casting and controlled playing with the fish, both close at hand and further away. The special feature of this rod series is the extreme conductivity of movement impulses. Its fittings with the finest cork, Fuji SIC guides as well as Fuji reel seats make this rod a highlight for every set of angling equipment.

YOUNGSTAR
The new, modern SPORTEX rod for the up-and-coming generation of spinning enthusiasts. This rod has been developed especially for children, with all the components adapted especially to the needs of the “little angler”. For easier handling of the rod, the length of the rear part of the handle has been deliberately shortened, and a smaller reel seat is incorporated. To make the blank more insensitive to impact, the HM Carbon material contains a small proportion of glass fibres. Like other Sportex models, the rod is characterised by lightness and speed. The blank has enough power reserves to bring bigger fish safely to the net, while the tough SIC guides provide for optimum heat dispersion and long casts. Of course, these rods can also be used by “bigger anglers” for perch, trout and other species.

FOR MAXIMUM FLEXIBILITY ON THE WATER

GRAPHENON TRAVEL ULTRA NEW

GRAPHENON TRAVEL ULTRA
The Graphenon Travel Ultra breaks down into extra short sections to fit into almost every suitcase, making it perfect for any fishing trip or for anglers on the move carrying just a simple rucksack. Despite the multiple sections, this is a rod with a superb action very similar to the regular spinning rods. When it comes to casting, there's no compromise. When it comes to playing, there's no contest. Further information on Graphenon can be found on page 8–9.

BLACK PEARL TRAVEL
The ideal rods in case of very limited space. With 5 sections, it is perfect for any rucksack or suitcase and shows a great performance as well as great power reserves while spin- or bottom fishing. The action is very harmonic and guarantees a lot of fun at rivers, lakes or sea. It comes in a quality hard case cordura tube! Both models are available in 2,70 m with 60 g or 80 g casting weight.

NOVA TRAVEL
Four-part travelling rod for your fishing holiday or alternatively for carrying on a two-wheeler to your favourite local fishing spot. The Nova Travel is a fast all-round rod, for lightweight to medium fishing with artificial and natural baits. The rod has a semi-parabolic action, ensuring optimum force distribution over the entire blank and allowing for really excellent casting distances. The rods are available in a length of 240cm, with a casting weight of 20g or 40g.

CARAT SPECIAL XT TRAVEL
These short-sectioned travel rods are the perfect companion for your travel plans. The clue: The Carat travel rods can be fished in two length – 2,40 m with 4 sections and 3,00m with 5 sections! This great feature – for example using from shore and boat – has no influence on the remarkable action of the blank. Whether abroad or at home, this rod offers you the best for every situation. Using the Helicore-Blank technology, the rod has great power reserves to reliably reel in unexpected big catches. The Carat Travel is available in 50 g and 70 g casting weights.

SALMON DE LUX TRAVEL
A four-section giant salmon rod, complete with tried and trusted SPORTEX HT cross-winding technology. The blank is made of several parts, but high-modulus carbon gives it the strength to deal with any salmon or taimen. Further information on Salmon de Lux can be found on page 36.

CARP RODS

FLEX OF SPORTEX CARP RODS

BENDING ROD TEST:

To visualise the character of each of our rods all blanks are precisely positioned in a measuring device and stress-tested with a uniform weight. The resulting images are digitally rendered onto a standardised diagram to show the actual flex of each rod. Note that this diagram displays the individual flex of a rod series but not its action (fast, medium fast etc).

Test conditions:

- Rod length 12 ft
- Cast 2,75 lbs
- **Carp-Rods:**
Bending tip with a weight of 500 g
- **Stalker-Rods:**
Bending tip with a weight of 1 kg

SPORTEX IMPRESSIVE CARP NEW

EXCELLENT CARP ROD SERIES WITH THAT CERTAIN SOMETHING!

Fuji Alconite-K Guides

45°-Mesh

IMPRESSIVE CARP

These rods use the highest quality Japanese carbon fibres with enormous tensile strength. This gives the blank even higher loading capacity and more speed. The whole assembly is made even stronger thanks to the special arrangement of the carbon fibres at a 45° angle. These properties ensure an outstanding performance in making long, precise casts. The Impressive Carp also has a

semi-parabolic action with progressive power distribution, giving it very good playing characteristics. The series is fitted with a FUJI DPS reel seat, high quality FUJI Alconite K long-cast guide arrangement and shrink wrap split handle. The continuous matt carbon finish at a 45° angle also provides that special 'look'.

SPORTEX INTENSE CARP

A TRUE HIGHLIGHT IN THE SPORTEX CARP FLEET!

DPS-double-reel seat
for excellent balance

Exclusive ghost-design surface
Depending on light exposure,
the X5-Cross carbon material is
changing visibility.

Guide sizes INTENSE CARP

INTENSE CARP

Looking at the blank, the first thing you notice is the unique X5 cross-carbon material in the Ghost design. Depending on how the light falls on the blank, this is visible or invisible. The special braiding of the individual carbon fibres gives this blank about 25% more strength and stability in relation to comparable blanks. The special epoxy resin with extremely fine nanoparticles also increases the speed of the blank as well as making it lighter. These hugely advantageous characteristics are particularly noticeable when casting. The blank is the ultimate loading machine and fires the rig precisely into

the feeding area over long distances and at enormous speed. The combination of a 'softer' tip and a powerful backbone makes for optimum control when playing a fish. The Intense Carp fittings include a FUJI DPS double-hood reel seat, which makes for a better balanced rod by allowing the reel to be positioned further forwards, or, if the need arises, further back. The FUJI SIC K long-cast guides boast an anti-tangle design for perfectly smooth line running. The exclusive surface design of the rod perfectly rounds off its stylish appearance.

SPORTEX PURISTA

OPTIMUM STRENGTH
DISTRIBUTION, FULL POWER!

PURISTA

PURISTA STALKER

PURISTA
Let's cast! The Purista is another advanced development in casting machines from SPORTEX. This series uses a dynamic blank made from the best high modulus carbon fibre. It has fantastic tensile strength and unbeatable properties such as perfect loading behaviour, rapid reset capacity and a powerful backbone, which combine to land the lead and bait right on target even at long distances. With these rods, casting is nothing but fun! And thanks to the optimum force distribution over the entire blank, there is always enough power available to guide even the biggest catches safely to the net. The lacquered 1K mesh surface finish, in combination with the slim FUJI TVS reel seat, gives the rod that special purist look.

PURISTA STALKER
We had so many enquiries about shorter rods in the Purista series, we decided to create two Stalker versions. Of course, we use the same blank for the Stalker models, and the same fittings as for the 12ft and 13ft models. The only change has been replacing the Duplon split handle with a full cork handle. The rods are ideally suited for accuracy from a boat, making them perfect for anglers who like getting out and about on the water or fishing in very tight spaces. The special damping qualities of the rod tire fish rapidly, as well as reducing the number of getaways.

FBC STALKER

FBC CARP

high-quality
SIC-Guides

FBC

The extremely successful and popular ‘old’ FBC series of rods have caught thousands of carp all over the world, but now it’s time to give them a complete upgrade. Certainly a rod like this carries obligations, and that’s why the new FBC Carp rods are so impressive with their elegant finish and enormous action, which they draw from our pioneering new Helicore blank on a nano base. When the blank is manufactured, a special resin is used, which is mixed with minute nanoparticles. These tiny particles bond the carbon fibres almost entirely free of any gaps, which leads to an almost 30% higher loading capacity of the blank. This blank technology has previously only been used among SPORTEX carp rods in the ONE Series.

The perfect loading properties of the lightweight blank allow for long, precise casts, which means that even spots at long distances can be reached with minimal effort. As well as this, the Helicore blank has extremely good damping properties, which help to reduce loss of fish over the last few metres of play. The progressive power transmission of the semi-parabolic blank gives the rod more than enough power to keep the fish away from obstacles and cause it to tire rapidly when being played. All FBC models are provided with a very light but stable reel seat made of aluminium, top-quality SIC guides and slim Duplon handles.

SPORTEX MORION ST

WITH MORION ST RODS, YOU ARE WELL PREPARED AT EVERY WATER!

MORION ST STALKER

MORION ST

MORION ST

One of the most popular carp rods in our range has had a total makeover. Like its predecessor, the Morion is built on a beautiful, slim and lightning fast blank. The tried and trusted SPORTEX HT-Cross Winding technology also makes the blank even tougher and gives it a really powerful action. Thanks to the excellent casting and damping characteristics of this rod serie long casts, right where you want them, are no problem. And the chances of fish getting away when being played are minimal. The new Morion Carp is the best weapon for any body of water.

MORION ST STALKER

The Morion Stalker is built on the same blank as the Morion Carp, but has a slim cork handle instead of Duplon. The rod lengths have been adjusted so that you can fish with no trouble at all in restricted spaces or from a boat – and with the best possible results. Despite being short, the Morion Stalker allows for excellent casting and deploys its full power to rapidly tire a fighting carp.

SPORTEX D.N.A. CARP

FOR ANGLERS WITH CARPING IN THEIR GENES.

D.N.A. CARP

D.N.A. CARP STALKER

D.N.A. CARP / D.N.A. CARP STALKER / D.N.A. CARP SPOD

For the blank of the DNA Carp, we have used Japanese high-performance carbon, which gives the rods an enormously fast reset capacity, meaning excellent casting distances with absolute precision.

The semi-parabolic action with progressive force distribution always provides the power needed, even when playing the biggest fish in the most testing situations. Of course, the rods also have very good shock absorption, which provides a buffer against fast attempts to get away and minimises lost fish.

The DNA series come with FUJI long-cast K-rings, which prevent any tangling of the line around the guides, and a FUJI DPS reel seat. DNA Carp rods are available either with a 'shrink wrap' split handle, or, for fans of classic design, a full cork handle. A matt 1K mesh surface finish gives the rods an extra touch of elegance on the rod pod.

Guide size CATAPULT CS-3 CARP	
12" 2,75 – 3,25 lbs.	
12"/13" 3,75 lbs.	

CATAPULT CS-3 CARP
The first choice when you need to fish over longer distances, this series uses Japanese high-performance carbon. This provides fantastic acceleration and power in the blank – both essential and decisive when it comes to making long casts. Particular attention was paid during the development phase to ensuring that the semi-parabolic blank reliably dampens down a fish's frantic attempts to escape. A top quality, slim K-style SIC guide arrangement, with a 50 start guide, means that all the rods have a smooth line run-through, reducing the risk of tangles when casting.

CATAPULT CS-3 STALKER
The short version of the Catapult CS-3 Carp rods, these models are perfect for using on boats or for stalking fish on the move. Despite being short, the rods have excellent damping properties and all the power needed to get big fish safely into the net.

CATAPULT CS-3 SPOD
A spod rod made from Japanese high-performance carbon with plenty of power to deliver enough feed in big rocket feeders right where it's wanted. Ideal for use on bodies of water where it is only possible to fish from the bank and the spod is lying at a distance.

CATAPULT CS-3 MARKER
A practical tool for getting information about the conditions at the bottom of a body of water. The sensitive blank reliably conveys the contours of different bottom structures right into the handle. To get even more information, simply fit a sensor lead or marker.

PARAGON CARP

Our new Paragon Carp series comes with a classic parabolic rod action. The blank, boasting our tried and trusted SPORTEX HT cross-winding technology, provides perfect feel, right into the handle, and makes for fantastic fun when playing a tough fighter. Other noteworthy features are the excellent shock absorbing properties, which mean that the risk of a fish slipping away at the landing net is very slight. The Paragon Carp also handles wild thrashing movements with ease, buffering them very effectively.

PARAGON CARP "OLD SCHOOL"

Rods with the same blank and action as the Paragon Carp. 'Old School' rods differ only in having cork handles.

PARAGON FLOAT

The new Paragon Float rods are ideally suited for fishing with floats or bread scraps, particularly in summer when the carp like coming to the surface.

PARAGON POWER FLOAT

The Paragon Power Float is based on the Paragon Float but has modified fittings. These include a new guide set (Seaguide XQG), a FUJI-VSS reel seat and a full-length Duplon handle. The action corresponds to the Paragon Float (with cork split handle).

PARAGON SPOD

A powerful spod rod for the precise delivery of large bait-filled rockets. Thanks to the very good loading properties of the blank, the Paragon Spod places the spod mix right on target at long distances, without any great effort. The perfect rod for waters where boats cannot be used for feeding. The rod also has a 50 start guide and a 20mm DPS reel seat for seating large reels easily.

SPORTEX COMPETITION CARP

COMPETITION CARP NT

COMPETITION CARP NT
This series is for carp anglers on a budget, but has the power and first-class fittings to rank it alongside more expensive options. The newly developed blank with its semi-parabolic action is designed to produce effortlessly long casts. The powerful backbone means that the rod can tackle even those big trophy carp, rapidly tiring them during the fight. The Competition Carp NT, with its attractive, modern design, comes with divided Duplon grips, SIC guides and an ergonomic DPS reel seat.

COMPETITION CARP NT – 3-TEILIG
The three-piece Competition Carp NT is ideal for space-saving transportation. Whether by bike or by car, there's always room for this short-sectioned rod.

COMPETITION CARP NT STALKER
The Stalker versions of the Competition Carp NT are intended for use from boats and are also ideal for carp anglers on the move – anyone who likes changing their spot in a hurry. The blank has excellent damping properties to cushion the fight that carp put up when close to the bank, preventing the fish from breaking away.

COMPETITION CARP NT SPOD
Here is the perfect rod for casting feed with a spod bomb to reach 'hot spots' at longer distances. The large SIC guide arrangement (type 50 first guide and 16 tip guide) ensure that the line glides smoothly through the guides when casting. A 20mm DPS reel seat keeps even big reels safe and secure.

LANDING NET

LANDING NET
The brand new landing net features frames of 42" (107cm x 107cm) and 50" (127cm x 127cm) build from extra light weight carbon arms and a break-proof spreader block made from tempered, glass reinforced Nylon. The fast drying and comfortably soft mesh completes this Sportex like premium set of Carp products.

CARBON-HANDLE FOR LANDING NETS
This 6ft light weight telescopic powerhandle is made from high-grade carbon for best performance and stability. Its innovative QuickFix Teleshaft allows you to easily extend and shorten the pole for best possible handling from shore, boat or when changing the net . The reinforced metal thread (British standard) perfectly works with spreader blocks and bait spoons for maximum flexibility and reliable operation.

MORION LANDING NET
This 1.8m landing net is made using the same carbon material and design as the blank on our much-loved Morion rods. It is available either as a one-piece design, or two-piece with a special quick lock arrangement. This means that the net can be rapidly taken apart for easy handling, for example for use in the boat after landing. The English thread arrangement also means that the net can be easily fitted with a scoop, for example.

LANDING NET

CATFISH RODS

SPORTEX TEAM WALLER Z

TEAM WALLER Z BOJE

TEAM WALLER Z SPIN

TEAM WALLER Z – BOJE
Introducing our new power rods using HT Cross Winding technology for catfish angling in rivers or lakes, in lengths of 2.75m, 3.05m and 3.30m and a casting weight of 300-600g. The rods have a semi-parabolic action that really demonstrates their strength when playing a fish in water where there are a lot of obstructions. The enormously strong backbone can be counted on to prevent the fish from settling in behind obstructions, and overcomes even the most powerful runs and tail flapping with no trouble at all. And of course, it also ensures that strikes will hold, even at substantial distances, and the fish can be brought securely to the bank. The rods come with extra stable SIC guides and a universal reel seat for fixed spool reels and multipliers.

TEAM WALLER Z – SPIN
Whether it's a soft bait, a blinker or a wobbler, with the new TW Waller Z Spin you can cast your lures exactly where you want them, and at real distances. Thanks to the HT Cross Winding technology, these rods are extremely robust, light and have a very sensitive tip, which passes the bait's movement and every take right up to your hand. The rods have plenty of power in reserve too, so always give you the upper hand all when playing the fish. The Z Spin light models are available with a casting weight of 80-150g, and the Z Spin version with a casting weight of 120-210g. The lengths of 2.5m to 3.2m make this series ideally suited for use from boats as well as from the bank.

TEAM WALLER Z – FIREBALL

The new vertical catfish rod is the ultimate answer for the really big heavy-weights. The completely redesigned blank, using the HT Cross Winding process, is made of high modulus carbon fibres and extremely wear-resistant Zylon fibres. Together, they give this rod extreme stability and strength. This rod now makes it possible for vertical rigs to be guided with absolute precision over the bottom, to even keep the bait dancing around the fish's head if needed. The powerful backbone ensures that the hook sits firmly after a strike, and the fish can be lifted and landed as rapidly as possible. Thanks to the extreme lightness of the rod, fishing can go on for hours without the slightest sign of fatigue.

TEAM WALLER Z – VERTICAL HEAVY

The new vertical catfish rod is the ultimate answer for the really big heavyweights. The completely redesigned blank, using the HT Cross Winding process, is made of high modulus carbon fibres and extremely wear-resistant Zylon fibres. Together, they give this rod extreme stability and strength. This rod now makes it possible for vertical rigs to be guided with absolute precision over the bottom, to even keep the bait dancing around the fish's head if needed. The powerful backbone ensures that the hook sits firmly after a strike, and the fish can be lifted and landed as rapidly as possible. Thanks to the extreme lightness of the rod, fishing can go on for hours without the slightest sign of fatigue.

TEAM WALLER Z – DRIFT

The ideal rods for when you want to draw the bait over the bottom, for example from a boat. So as to be able to feel exactly what the bait is doing under the water, the rods have been designed with an extremely sensitive tip, which allows for perfect bait control and bite recognition. And when playing the fish, the progressive power distribution of the HT Cross Winding blank does all the work to tire the fish as rapidly as possible and bring it swiftly to the surface with no trouble at all.

SPORTEX TURBO CAT

TURBO CAT FEEDER

TURBO CAT FIREBALL

TURBO CAT VERTICAL

TURBO CAT SPIN

TURBO CAT FEEDER

The new Turbo Cat Feeder was developed with input from our catfish specialist Jens Köller for fishing with natural bait and pellets in both still and flowing water. The rod comes with two changeable tips with different degrees of stiffness. The harder tip, with a 400g casting weight, is intended more for use in flowing water. One of its advantages is the bait can be fished at greater distances, due to the length of the rod lifting the line out of the water to avoid the pressure of the current. The Turbo Cat Feeder is the perfect all-round rod for tough adventure fishing for cats and other species.

TURBO CAT – SPIN

The current world record catfish was landed in spring 2015 in Italy on a predecessor version of the Turbo Cat Spin. Our new Turbo Cat Spin is built to go even better, thanks to the use of the very latest materials available on the market.

TURBO CAT – BOJE

This series of rods has been completely upgraded, and, as well as the 3.3m version, they now come in lengths of 2.4m and 3m, ideal for using from an anchored boat. Casting weight of the rods is 250-500g.

TURBO CAT – VERTICAL

Our new specialist rod for vertical fishing for big catfish. The single-piece blank, very light, extremely stable and flexible, is perfectly designed to go after big catfish using a wide range of vertical fishing techniques.

TURBO CAT – BELLY BOAT

Another special rod in our Turbo Cat range. Going after catfish from float tubes is becoming more and more popular, but this calls for special rods. That's why we came up with the new 'Belly Boat'. The special length of the blank – only 177cm – its shortened rear handle together with a casting weight of 150-200g, allows for perfect handling, which is a huge advantage when it comes to playing and landing the fish from a float tube.

TURBO CAT – DRIFT

The new Turbo Cat Drift is a real eye-catcher, with even better characteristics than before. The fine sensitivity of the blank has been improved still further, and now allows for better bait control and bite recognition during drift fishing.

TURBO CAT – FIREBALL

This rod was designed especially for modern Fireball angling. Particular attention has also been paid to the balance and lightness of the rod, making for hours of fatigue-free fishing.

MASTERGRADE GT POPPER

Our new and very high quality rod series for warm water fishing for GTs (Giant Trevally) with heavy poppers. The rods are made from high-performance Japanese carbon and fitted with a powerful tip, necessary for guiding even the biggest poppers properly in the water, for casting poppers long distances and for striking. The Mastergrade GT Popper has a powerful and continuous 'one-piece' action under loading.

MASTERGRADE TUNA SPIN

Developed specifically for fishing for tuna, this specially designed blank made from high-performance Japanese carbon allows for a wide range of baits, such as metal jigs, to be cast with excellent effect. The handle section sits very comfortably in the hand, even under the load imposed by fiercely fighting fish. The Mastergrade Tuna Spin produces a powerful and continuous action under loading.

MASTERGRADE SEACAST

This outstanding series of sea spinning rods is designed for a wide range of deep sea fish in locations like the Mediterranean and can be used from both shore and boat. The Mastergrade Seacast has a light, slim, fast blank, which generates enormous power and has a continuous action under loading. Excellent load and resetting properties launch the bait to very long distances with absolute precision. The tip is extremely sensitive and, in combination with the powerful backbone, makes every strike a certainty.

MASTERGRADE JIGGING

In the development of the Mastergrade Jigging, the main focus was on creating a very slim and lightweight blank that would still have extremely high loading capabilities and a completely continuous action. The lightweight versions (100g and 150g) are perfect for light to medium 'speed jigging'. The heavier versions, at 200g and 250g, are perfectly suited for presenting large soft baits or medium-sized natural baits. Thanks to their extremely lightness, these rods can be fished all day. They are fitted with FUJI Plus baitcast reel seats.

MAGNUS MASTERGRADE SURF

This new longer-distance hunter model for surfcasting has been developed in close cooperation with a very experienced surf casting professional. These exceptional rods use a very fast and powerful blank made of Japanese high-performance carbon, with excellent loading capacities for extra long casts. This allows the casting of weights of more than 200g, without the rod being overloaded. The ideal casting weight for reaching the maximum casting distance is 150g-180g. To achieve best possible bite recognition, the rod has been fitted with a highly sensitive tip enhanced by coloured markings.

SPORTEX NEPTOON

NEW

Seaguide-Reel seat

NEPTOON JIGGING

NEPTOON BOAT with Gimbal

NEPTOON BOAT with ALPS S-6 XN guides

NEPTOON SPIN NEPTOON BOAT

NEPTOON JIGGING

Modern rods with a sensitive tip and a backbone with an enormous loading capacity. The balanced tip action transfers right through the rod and allows the bait to be presented very naturally in the water. The rod has a continuous action, which means when a trophy fish is on the line the full power of the blank comes into play. The rods are fitted with tough EVA handle, strong Seaguide XEG SIC guides, a Pac Bay gimbal with rubber cap and a universal reel seat for use with multipliers or fixed spool reels. The 165cm and 185cm models at 20lbs are fitted with a baitcast reel seat.

NEPTOON BOAT

All-round rods for using artificial or natural baits in Norway, Iceland and similar locations. The NepTooN Boat has a very strong backbone, and a continuous action. The sensitive tip allows for ideal bait presentation and transmits bites with absolute reliability. All the components, such as the SIC boat guides from ALPS, the DPS reel seat from Seaguide and a gimbal with rubber cap from Pac Bay, are designed to be hard-wearing and long-lasting. The special guide arrangement means that multipliers as well as fixed-spool reels can be used.

NEPTOON SPIN

Fast spin rods for modern artificial bait fishing at sea. The dynamic high-resistance blank is perfectly suited for catching cod, black cod and similar species. The rods have very good casting properties and a powerful backbone for effective striking. The NepTooN Spin also allows for ideal bait presentation and first-class control of the fish during playing. The rods are fitted with strong Seaguide XQG SIC guides, Seaguide DPS reel seats and durable Duplon handles.

SPORTEX NEPTOON NEW

NEPTOON SURF

NEPTOON TROLLING

 **NEPTOON TRAVEL**
please look at page 86/87

NEPTOON SURF

These rods were developed in close cooperation with a well-known professional in surf fishing. The aim was to get the very best casting distance from the blank by having the right number of perfectly-spaced guides. The blank has an impressive loading performance and propels the rig towards the horizon, right on target and at enormous speed. The sensitive tip transmits even timid nibbles immediately; and when playing fish it performs magnificently in dampening shock and impact. Coloured markings at the tip also make visual bite identification easier. The rods are fitted with Seaguide BG SIC guides, Seaguide XDPS reel seats and a shrink wrap, balanced handle.

NEPTOON TROLLING

These rods are designed to provide the power needed when trolling for cod and big salmon. Despite this, the blank is sensitive enough to dampen aggressive bites and prevent determined escape attempts. NepToon Trolling rod can also be used to very good effect when trolling in freshwater. The rods are fitted with strong Seaguide XBG SIC guides, Seaguide DPS reel seats, durable Duplon handles and a gimbal with rubber cap from Pac Bay.

MAGNUS JIGGING

Our Magnus Jigging series has a finely balanced tip action, which provides optimum bait control. The specially matched action allows the bait to be drawn upwards in rapid short bursts for a really seductive presentation. Thanks to the Up-Tide arrangement, the blank has a uniform action with good resistance and without any interruption. When a bite comes, the rod backbone mobilises enormous reserves of strength and, even if a really massive halibut is on the line, the fight is only going to end one way... in a victory for you. The Magnus Jigging models are fitted with Low Rider SIC guides and a durable DPS reel seat from ALPS, as well as a gimbal with a removable EVA cover cap.

MAGNUS SPIN

With these from the Magnus Spin series, you are fully geared up to do battle with halibut, cod, coalfish and the like. The slimline, powerful and rapid blank has outstanding strength for casting and then playing the fish. The semi-parabolic action, with traditional hefty power reserves in the handle section, makes it possible for sufficient pressure to be constantly exerted on the hooked fish. Excellent loading and resetting characteristics mean that the bait can be pitched far out towards the horizon – and right on target. The fittings for the Magnus Spin include, among others, SIC guides and a durable DPS reel seat from ALPS.

MAGNUS BOAT

The Magnus Boat series impresses with a tough but lightweight blank made of high-modulus carbon, with uniform force distribution. The particularly sensitive tip will detect bites at greater depths. This also helps with bait control and with better feedback on what the bait is doing under the water. The semi-parabolic action of the Magnus Boat means that fighting fish tire very rapidly and can be brought to the surface with confidence. The rods are fitted with WDB and DB SIC guides and a durable DPS reel seat from ALPS. All Magnus Boat rods also have a gimbal with a removable EVA cover cap. The rods can be fished with a multiplier reel as well as with a fixed spool.

MAGNUS INLINER

The Magnus Inliner series has also been completely updated and extended by a number of shorter-length models. The newly developed blank is now appreciably lighter and slimmer compared to the older model, which makes the rods more evenly balanced in the hand. We made hardly any adjustments to the powerful and highly flexible action, because users love it just the way it is. The new Inliner rods do, of course, still have our innovative helical line guide system, integrated in the blank. Thanks to this, without interrupting the action curve, the line is guided through the entire inner blank. The open line in-feed guide with SIC insert and the accompanying threading wire make sliding the line a whole lot easier too. And a firm DPS reel seat from ALPS makes sure that the reel sits exactly where it should.

With large line slot ...

and innovative inner line guide system

SPORTEX JOLOKIA PILK Black Edition

JOLOKIA PILK Black Edition

JOLOKIA PILK Black Edition

The new Pilk rod series in the SPORTEX sea rod range come with an attractive modern black finish and a very good price-to-performance ratio. These rods are perfect for cod, coalfish or black cod, pollack and other sea predators. The tough, dynamic blank tires the fish rapidly and the

highly sensitive tip allows perfect bait guidance. The rods are available in lengths of 2.4m, 2.7m and 3m, with casting weights of 70g-150g, 120g-220g and 190g-400g. They cover the entire pilk fishing range.

MAGNUS TRAVEL BOAT

Short sectioned boat rods (three sections at 70cm or four sections at 63cm) for easy transport for fishing holidays at sea. Despite the number of sections, the rods still have powerful, identical actions and the same properties and fittings as the two-section version. The rods are available in lengths of 1.85m (20lbs / 30lbs) and 2.10m (30lbs / 50lbs).

MAGNUS TRAVEL SPIN

Thanks to its four-section design, the Magnus Spin Travel is the perfect companion for fishing holidays. The length of the sections, 64cm or 74cm respectively, means the rod fits into most travel bags. The rods are available in 2.40m and 2.70m versions with casting weights of 100g or 150g.

MAGNUS TRAVEL JIGGING

The Magnus Jigging Travel also has the same properties and fittings as its two-section sister model. The rods are available in a 1.85m version (three sections of 70cm) with 20lbs / 30lbs and a 2.10m version (four sections of 63cm) in 30lbs / 50lbs.

NEPTOON TRAVEL

The short sections making up this rod (either 68cm or 74cm) mean that it will comfortably fit in most suitcases. The rods have a high-modulus carbon blank with a semi-parabolic action ideally suited for catching a wide variety of fish. And when it comes to casting, the NepTooN Travel rods are easily as good as the two-piece versions.

XCLUSIVE FEEDER NT LIGHT

Perfect for lightweight feeder fishing with feeder basket at close and middle distances. Fun is guaranteed when playing roach, bream, tench etc. Also very good for fine bottom fishing for zander with small bait fish. Each rod comes with three sensitive carbon feeder tips in sizes 1oz, 2oz and 3oz.

XCLUSIVE MEDIUM LIGHT FEEDER

Ideally suited for light to medium-weight feeder baskets at close and middle distances, in both still and flowing water. This rod is at its best when fishing for roach, bream, tench and medium-sized carp. Provided with three sensitive carbon feeder tips in sizes 2oz, 3oz and 4oz.

XCLUSIVE MEDIUM FEEDER

These universal feeder rods are designed for medium-weight fishing for all non-predators in still and flowing water. The blank has excellent damping properties, minimising the possibility of escape when playing fish. A stiff backbone, with excellent loading capacities, propels the feeder basket to long distances, and quickly tires out fish. These rods cover the widest demands of feeder fishing. Comes with three sensitive carbon feeder tips in sizes 2oz, 3oz and 4oz.

XCLUSIVE MEDIUM HEAVY FEEDER

These rods are ideal for tackling hard-fighting barbel and carp in still and flowing water. They can also be used for eel fishing. Despite their enormous power, they still have the sensitivity needed to handle smaller fish as well. The high reset torque of the blank makes long precise casting effortless. They come with three sensitive carbon feeder tips in sizes 2oz, 3oz and 4oz.

XCLUSIVE HEAVY FEEDER

Designed for fishing with heavy feeder baskets, these rods guide the baskets precisely to their target without excessive effort and regardless of distance. The powerful backbone allows even extra-feisty fish to be guided securely out of the current and into the net. Provided with three sensitive carbon feeder tips in 3oz, 4oz and 5oz.

All SPORTEX Feeder rods feature three variable Feeder-tips.

RAPID FEEDER

These new universal application feeder rods for still and flowing water have a top price-to-performance ratio. The fast, slimline blank, made from high-modulus carbon, guarantees an immediate strike. The three sensitive feeder tips which come with the rod, in thicknesses of 1.5oz, 2.0oz and 2.2 oz, signal a bite whatever

the water conditions. The powerful backbone of the rod, in conjunction with the extra large guides at the tip, help to ensure long, high-precision casts.

The new Xclusive Feeder NT now comes with our fast and powerful Helicore blank. Made of T800 carbon fibres with nano technology, this blank has proved a milestone in rod construction in the spin and carp sectors. The rods now have even better loading properties than their predecessors when it comes to casting and they deploy enormous power when playing a fish.

SPORTEX CARBOFLEX CLASSX FEEDER

CARBOFLEX CLASSX FEEDER

CARBOFLEX CLASSX FEEDER

This new, universal feeder rod series is for light to middle-weight feeder fishing for all non-predacious fish in flowing and still water. The rods have really excellent loading characteristics that will cast feeder baskets extra long distances. The progressive semi-parabolic action produces plenty of power when playing fish and persuading it rapidly into the landing net. Three different coloured, fine, fast carbon tips of 1.5oz, 2oz and 2.5oz mean that every bite is signalled, allowing rapid and reliable strikes. The Carboflex ClassX Feeder models are fitted with tough EVA handles, SIC guides and DPS reel seats. They are available in lengths of 3.3m, 3.6m and 3.9m, with casting weights of 40g-120g.

EXKLUSIVE METHOD FEEDER

This newly-developed lightweight rod is ideal for light fishing for trout and more, with its focus is on lightness and sensitivity. The outcome is a very slim and extremely light blank, made of high modulus carbon with a sensitive action that makes for tremendous fun when playing fish. The rods are ideally suited for fishing with floats on rivers, as well as with Spirlinos on lakes. They are also suitable for lake fly fishing from the bank. The rods are fitted with special lightweight guides and a FUJI DPS reel seat. The Exclusive Trout is available in 3.6m and 3.9m with 10 g – 40 g casting weights.

RAPID METHOD FEEDER

Our new float rods have a very good price-performance ratio. They are designed for universal float fishing for species such as tench, bream, young carp fry and so on. They are also ideal for fishing with Spirlinos or Bombardas for trout. The blank, made from HM carbon fibre material, has a powerful backbone with a fast, sensitive tip. Its very good casting properties allow for long, well-targeted casts. The Rapid Float is available in the lengths of 3.3m, 3.6m and 3.9m with casting weights of 10 g – 40 g.

XCLUSIVE MATCH

This highest quality, state-of-the-art match rod is designed for universal use in flowing and still waters. They are built on an incredibly light, slim and fast blank, with a powerful action designed to apply sufficient pressure on big fish. The very fine and sensitive tip guarantees rapid bite indication and a reliable strike. Long, precise casting is made easy, while the SIC Match guides, set well off the blank, reliably prevent the line from sticking.

RAPID MATCH

As with the Exclusive Match models, the blank is very slim and fast. And thanks to the powerful blank, even medium-strength carp can be netted with the minimum of fuss. The narrow-spaced SIC match guides, set high from the blank, prevent wet lines from sticking to the blank and make for long, precise casts. The Rapid Match is available in lengths of 3.90m and 4.20m, with a casting weight of 8-16g.

XCLUSIVE FLOAT NT

The slim blank design of top quality high-modulus carbon material makes a great impression with its speed and loading capacity. The excellent loading properties of the Xclusive Float allow the float to be pitched at long distances and precisely on target. When the fish is being played, the blank reliably absorbs any wild thrashing movements from the fish, which makes for far fewer lost fish. The rod is very effective for trout fishing with Spirolinos, Bombardas etc. And when going after zander with bait fish, the rod cuts a very fine figure. The guide diameters have been selected in such a way that even rubber stoppers can slide through without any problem. The Xclusive Float is available in lengths of 3.60m, 3.90m and 4.20m with a casting weight of 20-40g.

XCLUSIVE FLOAT LIGHT NT

The lighter and even slimmer version of the Xclusive Float series also has a very fast, resistant and sensitive blank. It has been developed especially for float fishing for smaller coarse or prey fish such as roach, rudd, bream etc. It is, of course, also possible to adjust the rods for trout fishing with lighter Spirolinos or pre-weighted floats. Thanks to the fast action of the rods, a sure strike at a long distance is no problem at all. The Xclusive Float Lite is available in lengths of 3.60m and 3.90m with a casting weight of 10-30g.

RAPID FLOAT

Our new float rods have a very good price-performance ratio. They are designed for universal float fishing for species such as tench, bream, young carp fry and so on. They are also ideal for fishing with Spirolinos or Bombardas for trout. The blank, made from HM carbon fibre material, has a powerful backbone with a fast, sensitive tip. Its very good casting properties allow for long, well-targeted casts. The Rapid Float is available in the lengths of 3.3m, 3.6m and 3.9m with casting weights of 10g-35g.

SPORTEX XCLUSIVE BARBEL NEW

XCLUSIVE BARBEL
tip section available as 1,75lbs. and 2,25lbs.

SPORTEX SPECIAL RODS

**MULTIPICKER
SWING TIP
WINKLE PICKER**

XCLUSIVE BARBEL
The Xclusive Barbel is an old favourite that has now undergone a total modernisation. The completely re-designed blank readily meets every challenge that modern barbel fishing can throw at it, including fixed lead attachment and feeder basket applications. With the two tips at 1.75lbs and 2.25lbs, it is fully equipped to tackle still and flowing water alike. Owing to the harmonious semi-parabolic action, the rod always provides enough power to bring strong fish out of the current and under control. The Xclusive Barbel is the ultimate tool for the feistiest barbel – and can be also be used for all other kinds of non-predators as well.

MULTIPICKER, SWING TIP & WINKLE PICKER
All-purpose due to 2 complete tip sections including 2 Winklepicker tips and a swing tip with a common handle section. Anglers who have devoted themselves to fishing with swing tip and winkle pickers will be thrilled by this rod concept. The Multipicker can be used for both types of angling. The special feature about these Multipickers are the 2 complete tips and the common handle section, which, depending on the tip section, provides easy bite indication.

SPORTEX TREMARELLA

SPORTEX HEGENE

TREMARELLA
The market currently has only telescopic rods to offer the tremarella fisherman. While these have their advantages for easy stowing and carrying, they also have substantial drawbacks, such as noisiness, tendency to break and generally poor actions. However, the new tremarella rods from SPORTEX are based on a three-piece rod, eliminating these disadvantages. These super-light, sensitive rods are the ideal choice for professional tremarella fishing in trout regions. Thanks to the extremely lightweight blank design, hour-long controlled “quivering” of the rod is no problem. The high-speed blank is made from high-modulus carbon with a high reset capacity, allowing for spirolinos or bombardas to be transferred over long distances. The extremely sensitive and fast tip immediately signals the smallest nibble and ensures that the hook set is lightning fast. The rod’s powerful action also means that even big fish tire rapidly once hooked.

HEGENE
This newly-developed lightweight rod is ideal for light fishing for trout and more, with its focus is on lightness and sensitivity. The outcome is a very slim and extremely light blank, made of high modulus carbon with a sensitive action that makes for tremendous fun when playing fish. The rods are ideally suited for fishing with floats on rivers, as well as with Spirolinos on lakes. They are also suitable for lake fly fishing from the bank. The rods are fitted with special lightweight guides and a FUJI DPS reel seat. The Exclusive Trout is available in 3.6m and 3.9m with 10g-30g casting weights.

SPORTEX MYSTIX TROUT NEW

PERFECT RODS FOR TROUT ENTHUSIASTS!

MYSTIX TROUT
Makes every trout lose strength – and fast! Super sensitive and extra light, the Trout Area rod series offers fantastic casting performance. Designed for trout in both flowing and still waters, the continuous action of the carbon blank delivers extraordinary sensitivity right into the handle section. This allows even the smallest wobblers, twisters, spoons and soft lures to move seductively in the water. These rods also have a backbone strong enough to bring even the biggest and hardest-fighting rainbow trout to heel. They are fitted with high quality 4A cork handles and titanium AT SIC guides.

SPORTEX SYNORIS FLY NEW

SYNORIS FLY
Sportex has called on 12 years of experience and expertise in carbon fibres, resins, tapers and component choices to develop its next generation fly rod series, Synoris. Proprietary Helicore technology from Sportex fuses state-of-the-art T1000 carbon fibres with a resin enriched by nano particles to create a highly-responsive, well-balanced and powerful blank. Synoris Fly Rods effortlessly and accurately cast extreme distances -beyond the limits of other fly rods – yet giving the firm

assurance that this rod still has plenty more to come. They are excellent for overhead, roll and switch casting, and will deliver dry flies as perfectly as nymphs and streamers. They will also make the toughest of strikes and play the biggest fish with ease. The exclusive blank design features a matt finish in silver-grey and is enhanced with an extra light-weight aluminium reel seat with carbon-inlay. Hard-chromed snake guides, convenient marks to align the rod sections and a classy cork handle

complete the impressive aesthetics on this premium rod series. Synoris Fly Rods come in weights 3 to 10 from 260cm up to 300cm. A Czech/Euro-Nymphing rod and a double-handed version, each in 300cm lengths, are also available.

SPORTEX KYANITE FLY **NEW**

KYANITE FLY

The Kyanite Fly is the ideal rod for ambitious fly fishermen and offers everything a Sportex angler wouldn't want to miss. The superlight HM carbon blank is created with all the quality and precision associated with the Sportex brand. It performs with absolute harmony, is forgiving of mistakes but also powerful - and can surprise even the most seasoned caster. Whether overhead casting, switch casting or roll casting, Kyanite Fly rods create extra tight loops that are equally targeted and precise. In the lower line weights, the rods are perfectly adjusted to

the fine-tuned requirements of delicate fishing with dry flies and nymphs, while the more powerful models love heavy streamers and relish tackling bigger pike, asp and sea trout. The Kyanite is an absolute joy to use and has the scope to do so much more than other rods in the same class. The matt green blank comes with perfectly matched snake guides, a very light aluminium reel seat with wood inlay and a high quality cork handle. The rod is available in weights 3 to 8 and in lengths from 360cm to 300cm.

You want to protect your valuable rods and reels securely from damage! The SPORTEX Super Safe cases are not only practical and roomy, they provide double protection in comparison with other Bags . On the one hand by means of a flexible, attached inner shell made of shock-resistant

PVC, on the other by means of a waterproof, abrasion-resistant outer surface made of 1.680 D nylon woven fabric. The fitting with robust, corro- sion-protected metal zip fasteners, padded interior sections and padded shoulder straps is typically SPORTEX functional and designed for many

VIII

SUPER-SAFE ROD TUBE
FOR ONE RIGGED ROD
SUPER SAFE by SPORTEX is the perfect protection for your
high-quality, rigged spinning rods. The SUPER SAFE lining is
padded on the inside. An integrated, special reel box
facilitates the insertion of the complete assembled rod.
At home, simply hang your assembled equipment by the
hooks. Perfect! From 125 cm up to 165 cm.

IX

SUPER-SAFE HARD SHELL BAG FOR CARP RODS
A high-end bag for your carp rods, especially designed
for best possible protection of rods and reels. Both sepa-
rated rod-compartments, with embedded shock resistant
inner-shell, offer enough space for one rod with reel
each. Inside, the bag is very well padded and each rod
can beindividually fixed to allow best possible protection
of your rods. Even size #50 guides and large big pit reels
are no problem. A long extra side pocket offers enough
space for an umbrella, landing net or bank sticks. Two
additions side Bags are available for your accessories.

X

SINGLE SLEEVE FOR CARP RODS
Our brand new single sleeves in 12' and 13' for the safe
transport of single, mounted rods. The durable outer materi-
al as well as the strong inner padding allow for an excellent
protection of your rods. The reel-part was especially desi-
gned for large big pit reels. Obviously, rods with size #50
guides fit in comfortably as well. Using the karabiner at the
side, several sleeves can be connected.

XI

SUPER-SAFE
BAITCAST ROD TUBE
FOR AN ASSEMBLED ROD
This Super-safe rod tube for an
assembled bait-cast rod is the
ideal choice when you need to
protect a single-piece rod and
reel from impact damage.
The length of 2.10 m will
accommodate most conventional
bait cast rods.

years' use. All large Bags additionally have a new and easy-to-use ruck- sack function, that facilitates the transportation of your rods even more. In addition, all of the Bags have a practical fitting for hanging up your Bags . Each SPORTEX case is an ID for your valuation of your passion.

XII

SPORTEX LANDING NET BAG
There's plenty of space in this bag for
a net handle of up to 1.80 m in length
and a 42"/50" landing net. An interior
compartment with a self-securing
strip for retaining the handle, and an
air-permeable compartment for the
net, are among the bag's features.
The watertight, padded, inner material
prevents unpleasant smells and mould
formation.

XIII

SPORTEX TRAVELBAG
The Travelbag is designed for short
multi-part rods (up to five parts) with
a maximum length of 64 cm. The five
compartments and their self-securing
strips ensure that the rods are held safe
and secure. The Travelbag can be carried
either as hand luggage or in larger
suitcases.

SPORTEX BAGS

XIV

SPORTEX CARRYALL BAGS

SPORTEX has designed these top-quality Carryall bags for use in all weathers. A special PVC surface material, waterproof zip fasteners and waterproof base shell make them the ideal choice for protecting your fishing accessories against the wet. Carryall Bags have a spacious, padded interior compartment and three additional outside pockets. A padded carrying strap and two EVA carrying handles on the side make light work of carrying the bag, even when it's full.

XV

SPORTEX SPINNING BAGS

The perfect bags for the most avid lure anglers. A high quality PVC finish, amply dimensioned overlaps and waterproof zippers reliably protect the interior from moisture in all weather conditions. The premium bag easily holds two extra-large lure boxes and offers separate pockets to tidy stow pliers, hook removal or any other accessory. The basic version (no side pockets) features a mesh pocket in front and a Velcro-strip flap for fast and easy access.
