**EVERYTHING FOR
DEMANDING CARP AND
CATFISH ANGLERS.**

DISCOVER OUR NEW RANGE OF CARP AND CATFISH RODS!

Leaf through the following pages and get caught up in the enticing world of carp and catfish fishing – brought to you by SPORTEX. We've captured it all: the thrills and the spectacle of your favourite sport plus unique know-how and, of course, the best product innovations for the 2021 fishing season.

All pictures were taken in June 2020 and feature the prototypes of our new rods.

It is always an enormous pleasure to produce the SPORTEX catalogue for our followers. But it is also impossible to show our entire portfolio here. So please visit our website for more products and further details.

In addition to our latest catalogue, at www.sportex.de you will find the complete SPORTEX range – from rods and landing nets, to bags and clothing and various accessories. Thanks to the practical search function, you won't be fishing around for long; instead we'll direct you to the perfect product. Simply select your desired target fish and you'll be led to the most appropriate models alongside useful tips and tricks.

You can also register online for our 10-year blank guarantee – it's quick and easy. For useful tips about your new rod, please use the FAQs. And of course you can also quickly find your nearest SPORTEX dealer.

You should also know: we have a number of exciting videos featuring all the new products from a few very long and rewarding shooting days. Find them on our website, on our YouTube channel #SportexRods or on our Instagram account at sportex_germany

Nothing compares to a SPORTEX rod: they owe their legendary reputation to their unique innovative power combined with outstanding technology. Our products stand for absolute reliability, the highest possible quality and masterly craftsmanship, and they have been setting standards worldwide for more than 70 years.

Today we can proudly say that SPORTEX rods have shaped generations of anglers. But we believe progress never stops. You either ride the current or you get swept away with the tide. That's the SPORTEX way.

We are the benchmark in rod building! To this end we work every day with the very best materials, great craftsmanship, a special eye for detail... and a smile on our face. You can rely on it.

Your SPORTEX Team

Rod action

Extra Fast:

the blank primarily flexes in the upper third of the tip section. Further down the blank features a strong backbone.

- Sensitive bite detection
- Powerful and long distance casting

Fast:

the entire tip section of the blank flexes. The butt section offers a strong backbone.

- Sensitive bite detection
- Powerful and long distance casting

Medium Fast:

the rod flexes from its tip nearly down to the middle of the blank. The butt section offers a strong backbone

- controlled hook setting even on longer distance
- large distance casting possible

Medium:

the rod flexes from its tip all the way down to the middle of the blank. The butt section offers a strong backbone.

- controlled hook setting even on longer distance
- large distance casting possible

Slow Medium:

the blank flexes from its tip all the way down to just about the handle section.

- very healthy balance of power and best for fighting large fish
- excellent shock absorption even in close-up range

Slow:

the entire blank evenly flexes from its tip down to the handle and is quite soft.

- very healthy balance of power and best for fighting large fish
- excellent shock absorption even in close-up range

BEYOND

LONG-DISTANCE HUNTERS WITH GREAT SPEED.

Expect eye-opening power from the tip to the grip. Thanks to its heptagonal carbon blank, the Beyond Carp has a number of extraordinary capabilities including outstanding speed when casting and thrilling dynamics when fighting. In short, the benchmark for ambitious carp anglers.

REVOLT

STIRS CARP INTO ACTION.

Time for a rod revolution. With its new heptacore blank, the Revolt Carp guarantees success on the water. Thanks to its outstanding casting strength and immense power, even big carp will fear for their safety.

SPORTEX BEYOND CARP

A REVOLUTIONARY ROD SERIES
WITH OUTSTANDING PROPERTIES.

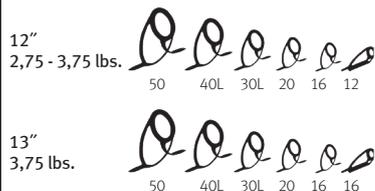

HEPTACORE

Fuji-Reel seat

BEYOND CARP

When it comes to casting long distances, there is just no ignoring these futuristic rods: thanks to their special new blank construction, you'll find yourself covering much larger areas with significantly less effort. And when fighting fish, no matter how strong, it's immediately obvious that these rods have enormous reserves of power to make a real difference. This makes it much easier to pull large carp out of whatever jungle is keeping them under the water. Of course, the blank has excellent damping properties to cushion violent escape attempts with minimal effort. Plus there's less risk of your hook slipping. A dream for carp hunters everywhere!

SPORTEX REVOLT CARP

UNIQUE SPEED AND SENSITIVITY COME AS STANDARD.

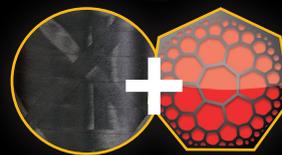

REVOLT CARP

The little sister of Beyond Carp, the Revolt Carp also features our great heptagonal heptacore blank – together with the same outstanding abilities including optimal loading, fantastic casting dynamics and enormous power reserves. You'll find yourself reaching swims you never imagined. And when it comes to the fight, this 'power rod' fully exploits its ingenious damping properties, meaning the fish gets tired quickly and won't slip away easily. Additional special features include an ergonomically designed Duplon handle, specially painted FUJI TVS reel seat, and slim SIC rings in KW style with a 50 start-guide and removable FUJI hook eyelet. The Beyond Carp is also available as a 10ft stalker version in 2.75lbs or 3lbs with a 30 start-guide. In short: everything you need for successful carp fishing.

TECHNICAL INFORMATION

The new Heptacore blank, which is made of T1000 carbon fibres, breaks with convention. Unlike the other 99.9 per cent of rods on the market, it is not manufactured in a circular shape but instead in a seven-sided cross-section. Thanks to a special and very complex manufacturing process, we can now get the absolute best out of the material. Meaning each Heptacore blank delivers around 15 percent more power and about 20 percent better casting performance than a normal blank.

SPORTEX GRAPHENON CARP

THE ULTIMATE POWER COMBINATION
OF HIGH-TECH CARBON AND GRAPHENE.

Fuji-Reel seat

GRAPHENON CARP

The Graphenon Carp owes its impressive performance to its enormous power deployment and resistance when playing fish. It's always the rod – not the angler – doing the work. The excellent damping properties of the blank make the fish tire very quickly and reduce the risk of it getting away just short of the landing net. The rod's rapid reset capacity, in combination with great loading dynamics, also allows for very long and precise casting.

GRAPHENON CARP BOAT

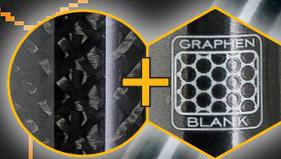

This shortened version of the Graphenon Carp is ideally suited for use on boats or in restricted spaces. Despite being short, these rods generate enough power to match any carp, while casting from the bank is simple and stylish.

TECHNICAL INFORMATION

The name gives it away.... alongside carbon, we also use graphene as a major component. Graphene is a carbon modification with a two-dimensional structure. Each carbon atom is surrounded by three others at an angle of 120°, which creates a honeycomb pattern. It has the highest tensile strength of any previously known material (e.g. 125 times higher than steel). The rod blanks contain around 20% graphene, which makes a massive contribution to load capacity, speed and casting performance.

The advantages:

- A healthy margin in casting distance and precision
- Extraordinary sensitivity
- Inconceivable power

SPORTEX IMPRESSIVE CARP

THE NEW CARP ROD SERIES
WITH THAT TOUCH OF MAGIC.

IMPRESSIVE CARP

Für die Fertigung dieser innovativen Ruten verwenden wir hochwertigste These rods use the highest quality Japanese carbon fibres with enormous tensile strength. This gives the blank even higher loading capacity and more speed. The whole assembly is made even stronger thanks to the special arrangement of the carbon fibres at a 45° angle. These properties ensure an outstanding performance in making long, precise casts. The Impressive Carp also has a semi-parabolic action with progressive power distribution, giving it very good playing characteristics.

The series is fitted with a FUJI DPS reel seat, high quality FUJI Alconite K long-cast guide arrangement and shrink wrap split handle. The continuous matt carbon finish at a 45° angle also provides that special 'look'.

The advantages:

- A healthy margin in casting distance and precision
- Extraordinary sensitivity
- Inconceivable power

FBC
CS-3

**CASTING DYNAMICS
AND POWER AT THEIR VERY BEST.**

Faster, further and more powerful: thanks to its new Helicore blank, this innovative rod series delivers in all areas – starting with outstanding casting performance through to enormous acceleration and exponential power when fighting. It's how carp fishing was meant to be!

Milan Hrcir,, Teamangler Carp
Czechia

"The FBC CS-3 catches the eye with great design and outstanding features: the full EVA handle, which becomes thicker towards the end, is great for casting. And the visual highlights, including an aluminium roll holder in subtle anthracite and slim, shiny black guides, are awesome!"

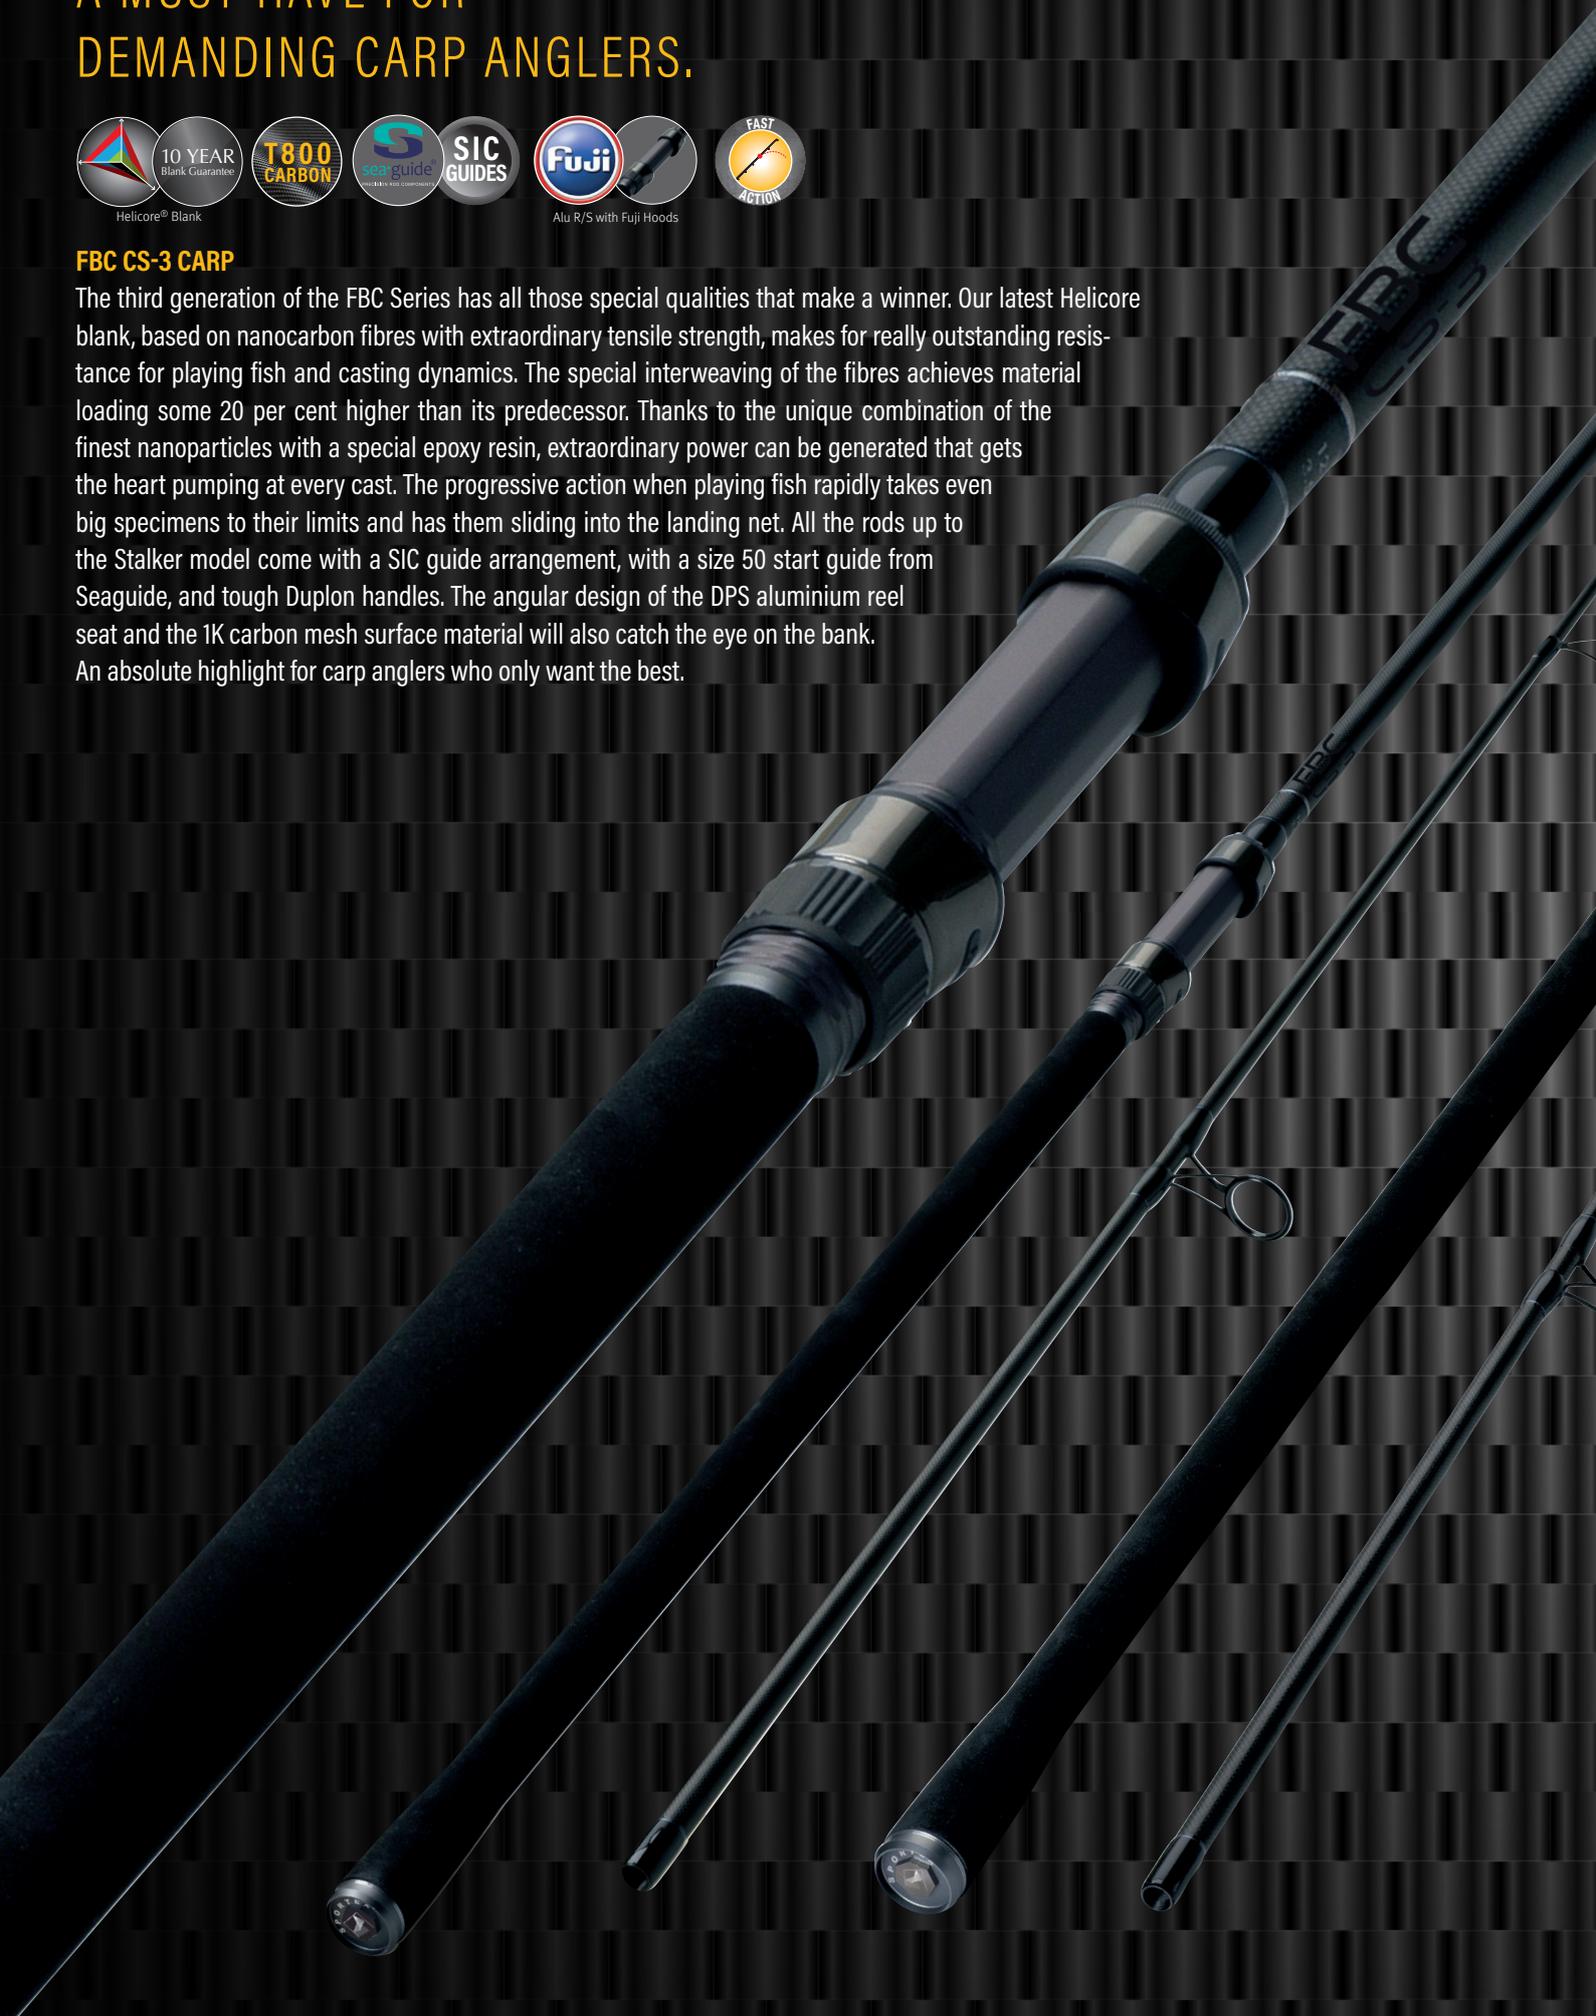

SPORTEX FBC CS-3

A MUST-HAVE FOR
DEMANDING CARP ANGLERS.

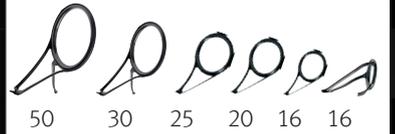

FBC CS-3 CARP

The third generation of the FBC Series has all those special qualities that make a winner. Our latest Helicore blank, based on nanocarbon fibres with extraordinary tensile strength, makes for really outstanding resistance for playing fish and casting dynamics. The special interweaving of the fibres achieves material loading some 20 per cent higher than its predecessor. Thanks to the unique combination of the finest nanoparticles with a special epoxy resin, extraordinary power can be generated that gets the heart pumping at every cast. The progressive action when playing fish rapidly takes even big specimens to their limits and has them sliding into the landing net. All the rods up to the Stalker model come with a SIC guide arrangement, with a size 50 start guide from Seaguide, and tough Duplon handles. The angular design of the DPS aluminium reel seat and the 1K carbon mesh surface material will also catch the eye on the bank. An absolute highlight for carp anglers who only want the best.

PURISTA XTF

CASTING AND POWER DISTILLED TO THEIR ESSENCE.

Pure joy! With its fast carbon blank, this ingenious carp rod enables you to make significantly longer, and more precise, casts. Added to this its well-balanced action absorbs frantic attempts to escape when fighting fish. An absolute must-have for all carp hunters!

Sven Omloop, Teamangler Carp
Netherlands

„I was deeply impressed with the power of the blank, right from the very first cast. I've thrown a lot of carp rods, but the new Purista XTF Carp is really something special.“

SPORTEX PURISTA XTF

A TOP ROD WITH BRILLIANT
CASTING AND FIGHTING ABILITIES.

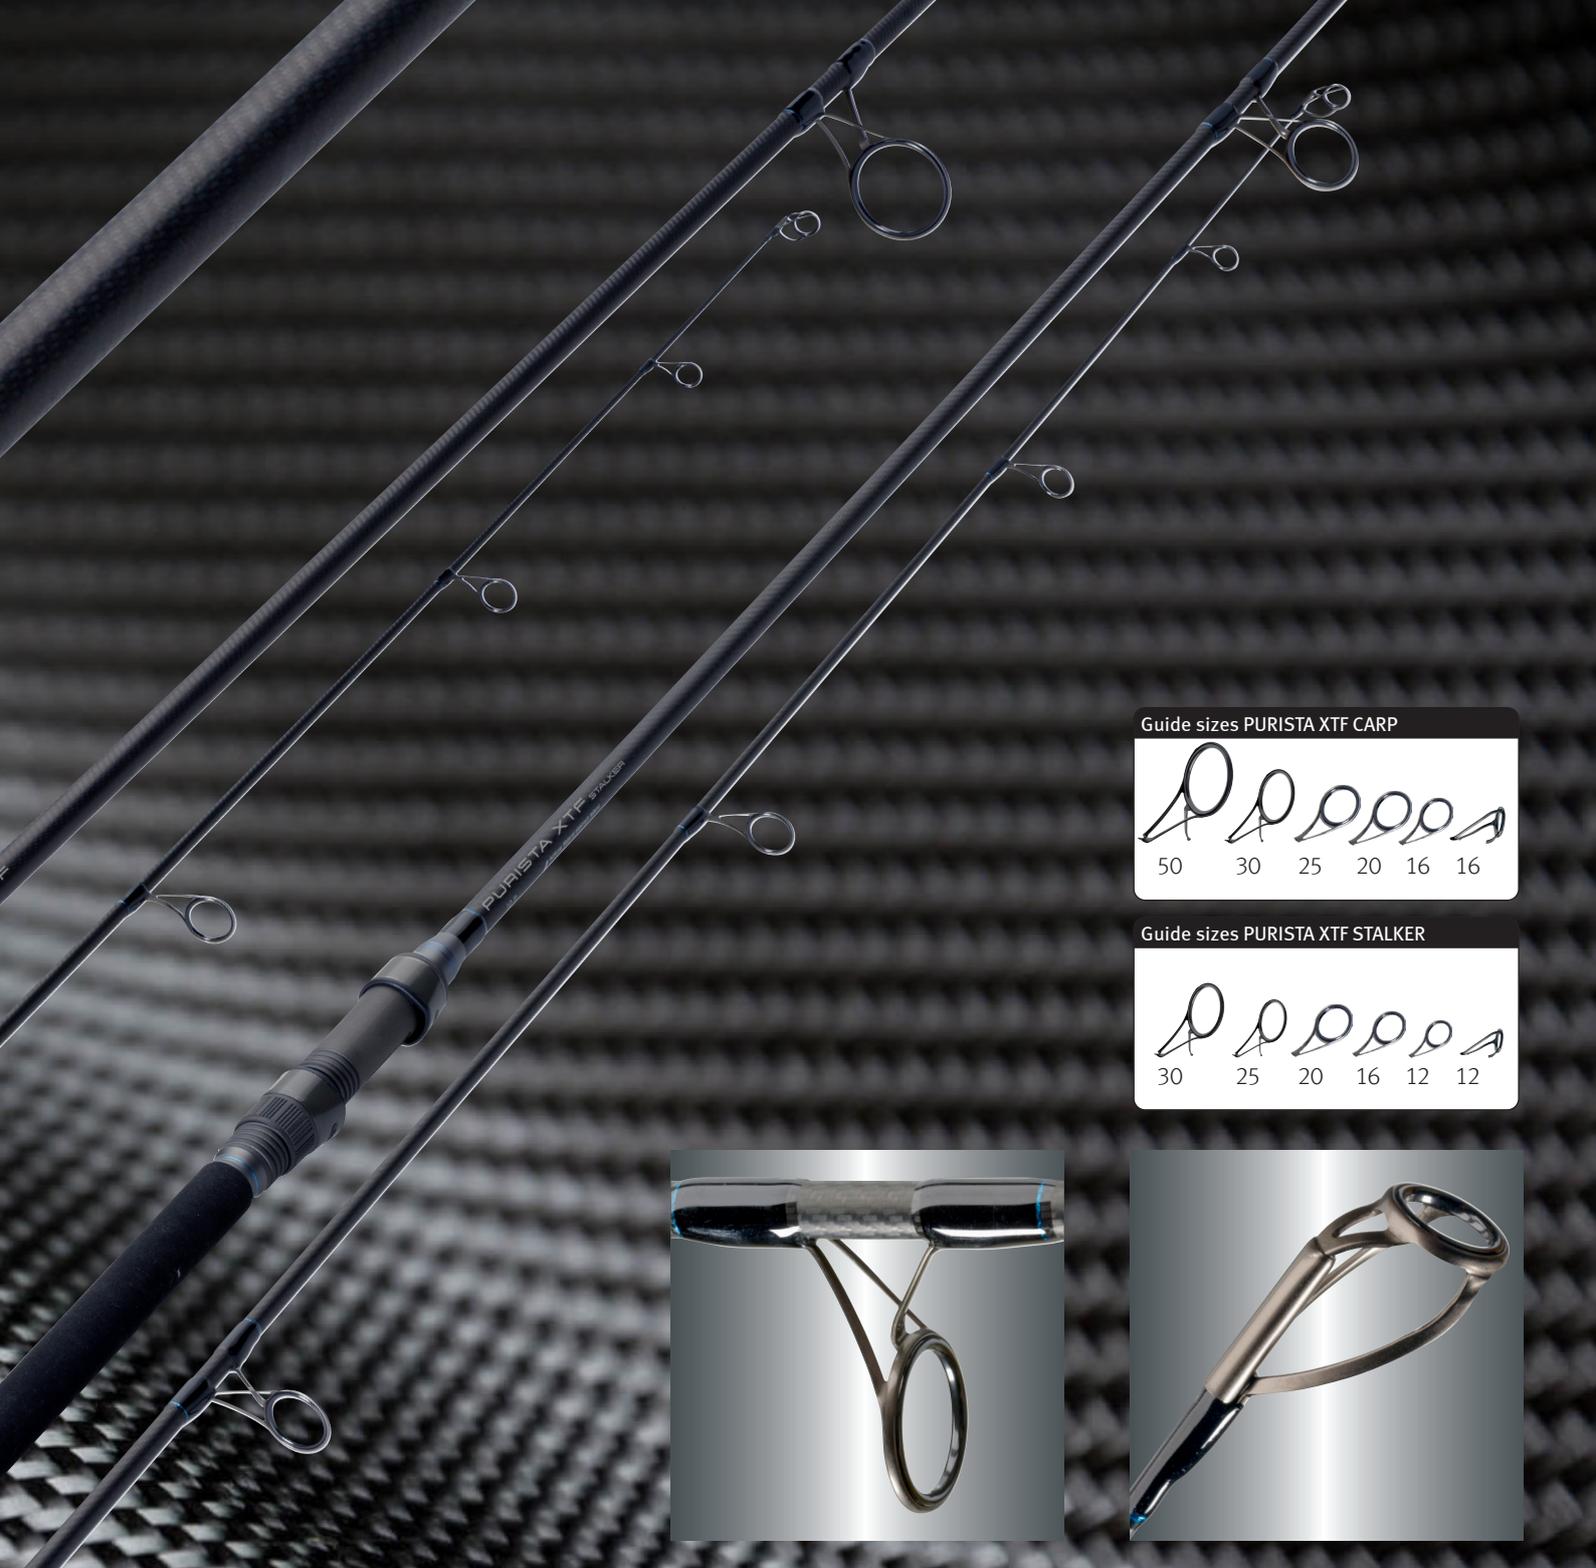

PURISTA XTF

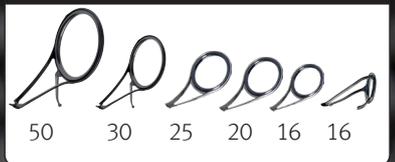

A real gem from our innovative long-range rod series. The enormous speed of the blank, made of Japanese high-performance carbon with a special fibre arrangement at a 45-degree angle, is all it takes to convince anyone of the prowess of the Purista XTF Carp.

Thanks to the fantastic loading capabilities and an extremely fast recovery, the tip has visibly less oscillation, which makes for considerably longer and more precise casts. And when it comes to playing a carp, the balanced action ensures fish can't give you the slip just before the net. All the models come with robust FUJI DPS reel seats, stable Seaguide SIC guides and all-round EVA handle sections. Up to the two Stalker versions, the rods have size 50 start guides. All you need for pure enjoyment on the water!

SPORTEX COMPETITION CS-4 BREAKOUT

SUCCESSFUL CARP FISHING
IN A NUTSHELL.

COMPETITION CS-4 BREAKOUT

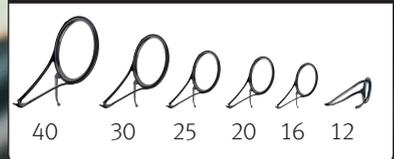

These innovative rods, with extendible sections, have the same blank, identical action and very similar fittings to the two-piece model, plus the size 40 start guide and all-round EVA handle section.

The big advantage is that, due to its compact dimensions, the Competition CS-4 Breakout can be easily transported, even in small vehicles. And of course, it is perfectly suited for use in a boat or in confined spaces. You can't get more practical and flexible than this!

///RAPID

THE FINEST FEATHERLIGHT COARSE RODS.

Fans of light coarse fishing will be licking their lips: whether it's feeders for roach and bream or the thrill of carp fishing with light tackle, we have your perfect precision tool that is a proven fish-catcher!

OUTSTANDING AND UNIQUE RODS FOR NON-PREDATORS:

RAPID FEEDER LIGHT

These exceptional rods, built using Japanese high-modulus carbon, are ideally suited for fishing with lightweight feeders at close and middle distances, in flowing or still water. The high-speed spine makes for first-class casting performance and steers even big fish steadily and surely out of the current. The Rapid Feeder Light comes with a robust Duplon handle, stable SIC guides and a top quality DPS reel seat. Also included in the package are three highly-sensitive full-carbon tips, in sizes of one, two and three ounces, which pick up every bite, however slight. A perfect precision tool for successful feeder fishing for roach, tench, bream and other species!

RAPID FEEDER MEDIUM

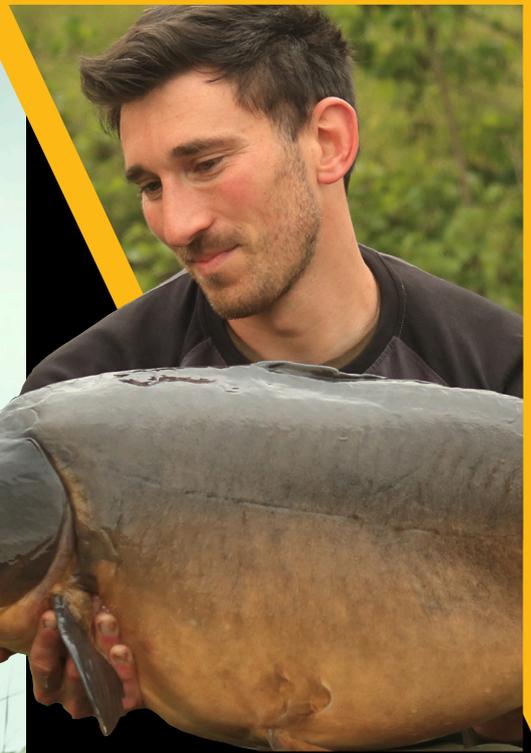

The all-rounder kings for fishing with mid-weight feeders in flowing and still water, these innovative feeder rods are made of Japanese high-modulus carbon. The fast, sensitive blank covers all the casting ranges you can imagine and delivers first-class fun when it comes to playing fish. Add to that excellent damping characteristics and you will be reducing the number of fish that get away and sliding even bigger fish safely into the landing net. The Rapid Feeder Medium has a robust Duplon handle, stable SIC guides and a top quality DPS reel seat. Three different high-sensitivity full-carbon tips, in sizes of two, three and four ounces, which pick up every nibble, however slight, are also part of the offer. The right choice for everyone who wants to put feisty barbel, bream or carp onto the scales.

RAPID FEEDER HEAVY

The perfect choice for fishing with heavy feeders for bigger fish in flowing and still water. The blank is extremely resistant and has excellent casting properties to drop your rig in the right spot. The Rapid Feeder Heavy has a robust Duplon handle, stable SIC guides and a top quality DPS reel seat, plus included in the deal are three highly-sensitive full-carbon tips in sizes of two, three and four ounces. The answer to every feeder fan's dreams!

RAPID PELLETT FEEDER LIGHT

Perfect for light-weight fishing with pellet feeders in flowing and still water. The fast and extremely sensitive blank, made of Japanese high-modulus carbon, allows for long casts and secure strikes. The excellent damping characteristics make it extremely difficult for a fish to escape the hook. The 10-foot version is ideally suited for fishing at shorter distances. Among the top quality fittings are stable SIC guides, a robust DPS reel seat, and the latest EVA handle. In short, everything you need for successful pellet fishing!

**Hans Poortmans, Teamangler Carp
Netherlands**

„I was extremely impressed by the new Rapid rod series: the Heavy Feeder model I threw is an absolute stunner, which you may not even notice at first with its cool, refreshing design and surprising lightness!“

SPORTEX RAPID

OUTSTANDING AND UNIQUE RODS FOR NON-PREDATORS:

Pure Carbon Taper
Blank surface

fully carbon Top
(all Feeder rods)

RAPID PELLET WAGGLER

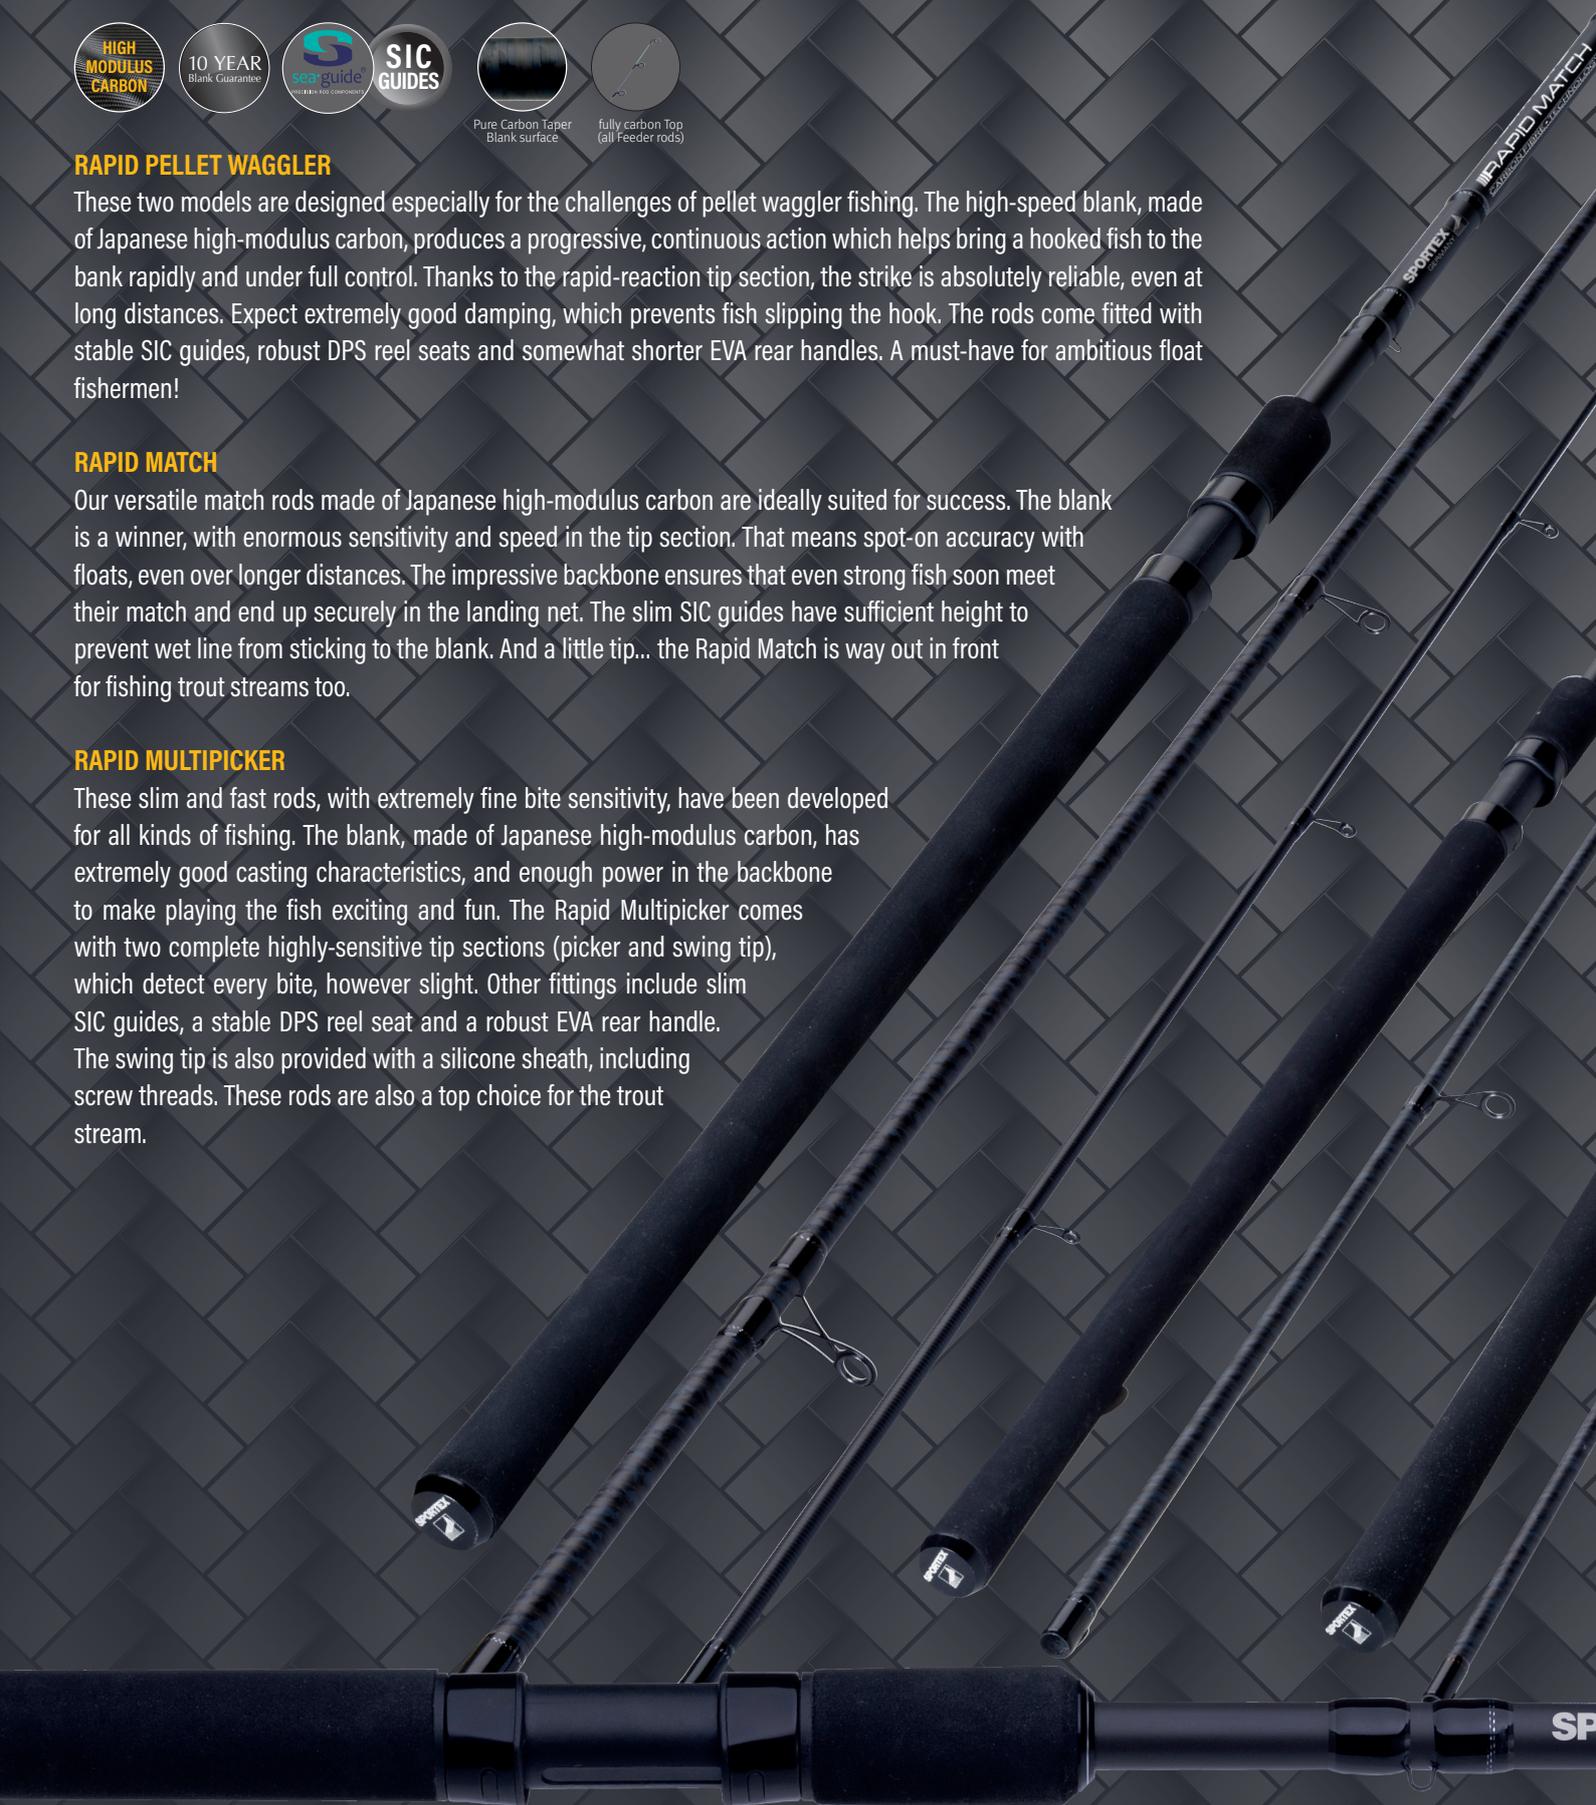

These two models are designed especially for the challenges of pellet waggler fishing. The high-speed blank, made of Japanese high-modulus carbon, produces a progressive, continuous action which helps bring a hooked fish to the bank rapidly and under full control. Thanks to the rapid-reaction tip section, the strike is absolutely reliable, even at long distances. Expect extremely good damping, which prevents fish slipping the hook. The rods come fitted with stable SIC guides, robust DPS reel seats and somewhat shorter EVA rear handles. A must-have for ambitious float fishermen!

RAPID MATCH

Our versatile match rods made of Japanese high-modulus carbon are ideally suited for success. The blank is a winner, with enormous sensitivity and speed in the tip section. That means spot-on accuracy with floats, even over longer distances. The impressive backbone ensures that even strong fish soon meet their match and end up securely in the landing net. The slim SIC guides have sufficient height to prevent wet line from sticking to the blank. And a little tip... the Rapid Match is way out in front for fishing trout streams too.

RAPID MULTIPICKER

These slim and fast rods, with extremely fine bite sensitivity, have been developed for all kinds of fishing. The blank, made of Japanese high-modulus carbon, has extremely good casting characteristics, and enough power in the backbone to make playing the fish exciting and fun. The Rapid Multipicker comes with two complete highly-sensitive tip sections (picker and swing tip), which detect every bite, however slight. Other fittings include slim SIC guides, a stable DPS reel seat and a robust EVA rear handle. The swing tip is also provided with a silicone sheath, including screw threads. These rods are also a top choice for the trout stream.

RAPID STALKER

Any angler who prefers going after carp with slightly lighter tackle will love these rods. The blank, made of Japanese high-modulus carbon, has excellent damping characteristics for playing the fish. Every cast is superbly cushioned right down to the handle, which makes for first class fun when playing fish. And the backbone still has enough power in reserve to bring fish settled deep in the weeds up to the surface. Thanks to its compact format, the Rapid Stalker is also ideally suited for fishing from boats or in confined spaces. And it is far and away the master of precise casting up to middle distances. The top quality fittings include stable SIC guides, a robust DPS reel seat and a slim EVA rear handle. A fine addition for the enthusiastic carp hunter!

Christopher Schneider, Teamangler Cat
Germany

„The new TOP Cat rods have become
MEGA: real eye-catchers with technical
qualities to match. Take the „Boje“ model,
with its increased number of guides,
super stable hook keeper and part-cork,
part-EVA handle. Simply TOP class!”

TOP CAT

WONDER WEAPONS FOR CATFISH HUNTERS.

For those big specimens with whiskers. Whether you are casting with lures, vertical fishing under the boat or anchoring at a distance – all the models in this innovative rod series impress with enormous power and unique sensitivity: each one an absolute must for the ambitious catfish angler.

SPORTEX TOP CAT

OUR RANGE OF POWER RODS
FOR SUCCESSFUL CATFISH ANGLING.

TOP CAT SPIN

These super dynamic lightweight rods are ideally suited for successfully chasing catfish with a whole range of lures, including wobblers, blinkers and soft baits. Thanks to the excellent loading and recovery characteristics of the robust Japanese high-performance carbon blank, long, precise casts become child's play. The handle section has been reinforced with a special carbon mesh fabric, giving the angler plenty of power to play really exceptional fish and keep control at all times. Also featured are top-quality SIC K-style long-cast guides in an anti-tangle configuration, which guarantee a flawless run of the line during casting. A top choice for chasing catfish!

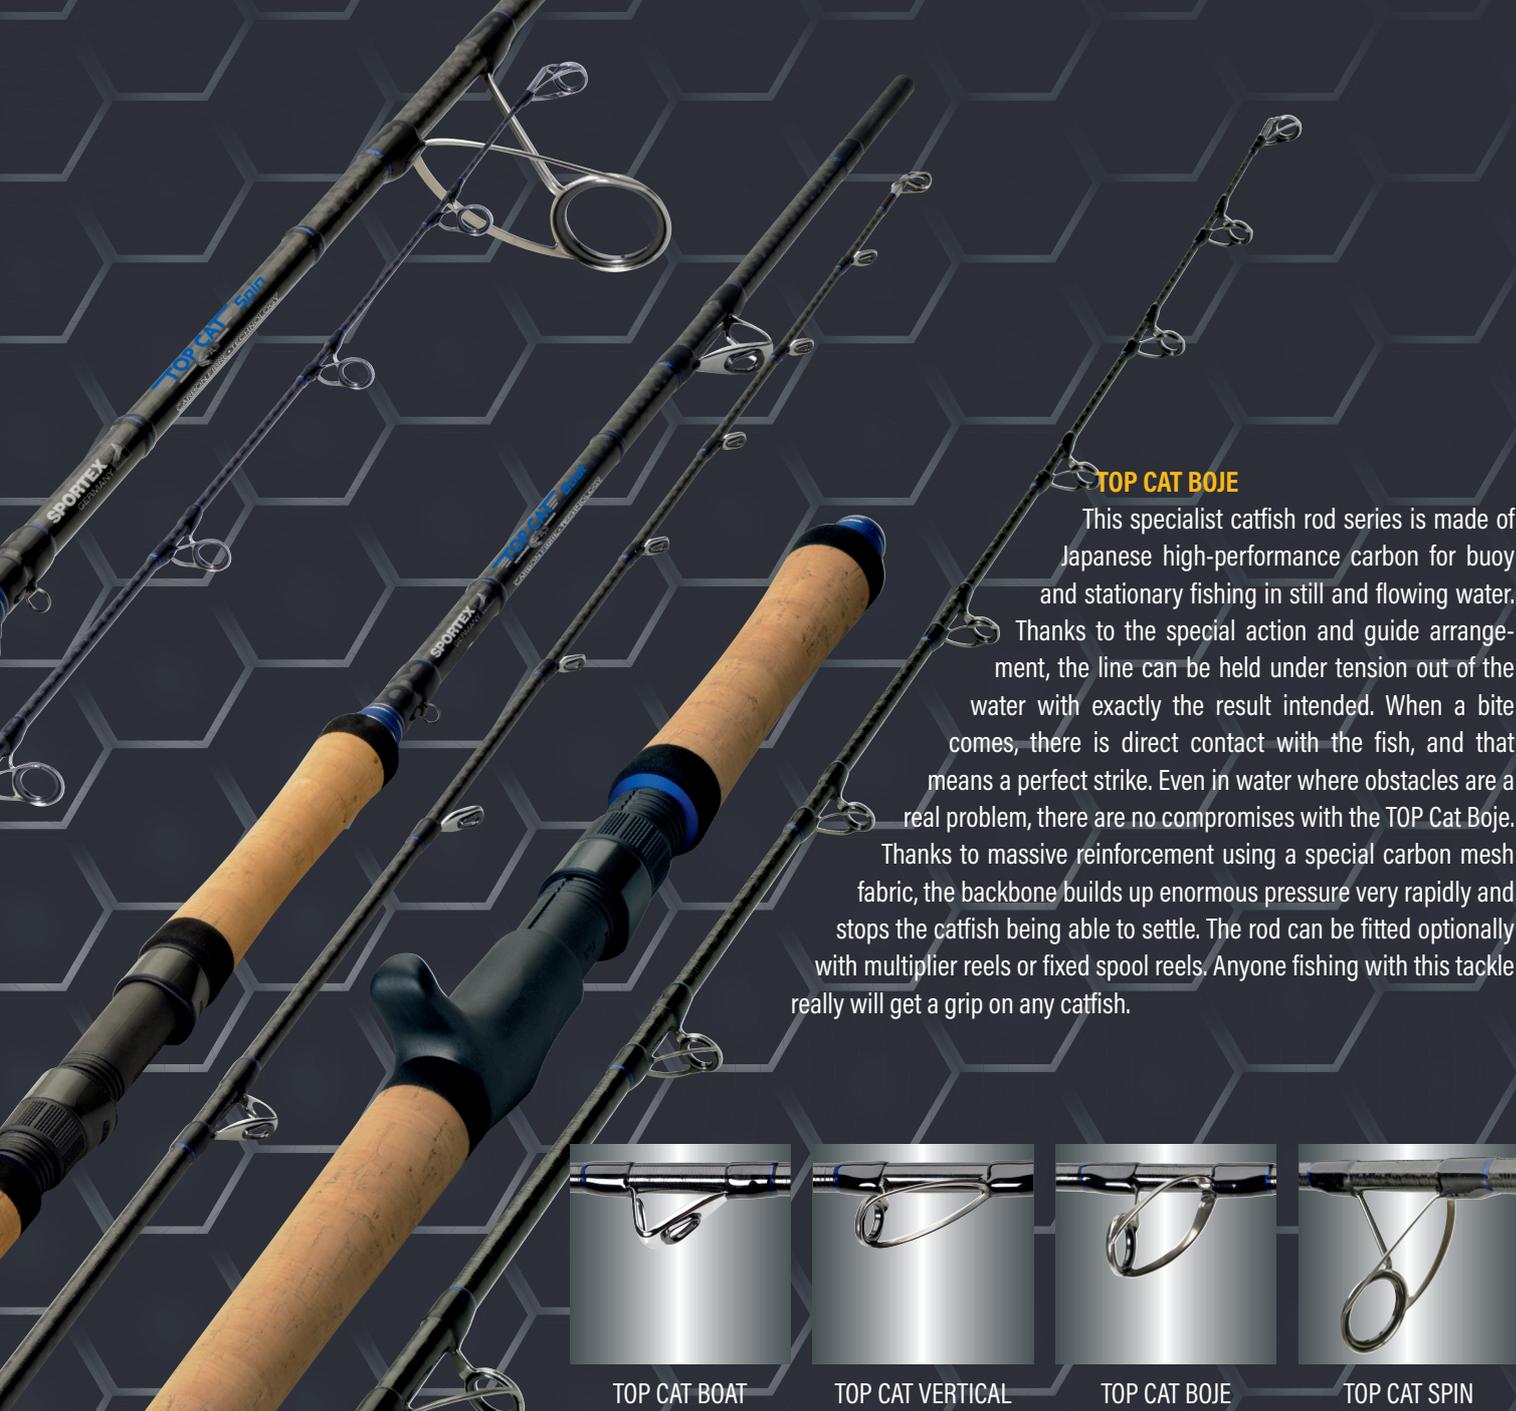

TOP CAT VERTICAL

Perfectly suited for the use of fireballs, clonk teasers and other tackle, these special catfish rods are designed for vertical fishing. The extremely sensitive blank, made of Japanese high-performance carbon, holds the bait precisely in position for Wels catfish to suck it in with no effort. The special design of the tip section allows for continuous action, and reliably conveys even the gentlest take right down to the handle. The fast and powerful backbone, with its special carbon mesh fabric, allows for a powerful lift, and rapidly takes the fight out of the fish when it is being played. The two 'standard' models come fitted with robust guides, and can be used optionally with multiplier and fixed spool reels. An Inline version with a multiplier reel seat is available too, which, due to the absence of guides and the line running inside the blank, curves noticeably more effectively under load. And that means even more enjoyment when it comes to playing the fish. Simply the BEST!

TOP CAT BOAT

Any angler who likes fishing for catfish from a boat will love this rod. The sensitive action of the tip section does all the work when it comes to bait presentation and bite recognition. Regardless of whether you prefer to drift to where the action is or anchor on a hot spot, with the TOP Cat Boat the right tool is always in your hands. To bring the fish under control as fast as possible after the strike, the rod has an extremely strong backbone with progressive strength distribution, reinforced by a unique carbon mesh fabric. No specimen fish is going to get away from this rod in a hurry! And thanks to the special boat guides, both multiplier and fixed spool reels can be used. Putting it simply, this is how to handle catfish!

TOP CAT BOJE

This specialist catfish rod series is made of Japanese high-performance carbon for buoy and stationary fishing in still and flowing water. Thanks to the special action and guide arrangement, the line can be held under tension out of the water with exactly the result intended. When a bite comes, there is direct contact with the fish, and that means a perfect strike. Even in water where obstacles are a real problem, there are no compromises with the TOP Cat Boje. Thanks to massive reinforcement using a special carbon mesh fabric, the backbone builds up enormous pressure very rapidly and stops the catfish being able to settle. The rod can be fitted optionally with multiplier reels or fixed spool reels. Anyone fishing with this tackle really will get a grip on any catfish.
